# COUNTDOWN
SET UP INSTRUCTIONS

Adding a Countdown Automation to the Sector Selector

Countdown automations allow you to turn their devices on or off after a set amount of time. The Brilliance Smart app can turn on a Sector Selector device if it is off, and it can turn off a Sector Selector if it is on. For example, if you turn lighting on at an unplanned hour, such as the middle of the night, you can use a countdown automation to turn devices off after a period of time you define.
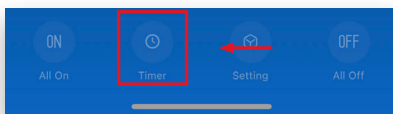

1. Download Brilliance Smart from the Apple App Store or Google Play by scanning the QR code. Register for an account if you are a first time user.

2. Open the Brilliance Smart app and select the **Sector Selector** device that needs a countdown timer.

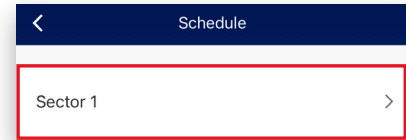

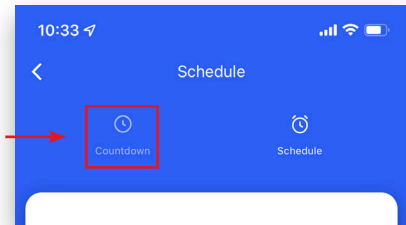

3. In the bottom panel, tap **Timer**.

You can set a countdown timer for up to 23 hours and 59 minutes.

*Example: Setting the countdown timer to turn off Sector 1 in 10 minutes.*

4. Select **Sector 1**.

**5.** At the top of the screen, tap **Countdown**.

6. Tap 01m and scroll up to select **10m**.

Countdown Set Up - Continued

**7.** At the bottom of the screen, tap the **Start** button**.**

8. The countdown timer will begin. The countdown timer will continue to run in the background of the app. The countdown automation is complete.

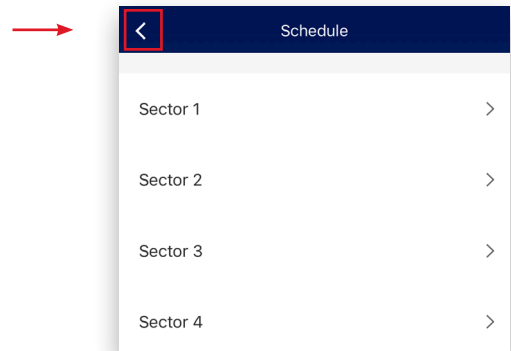

Example complete.

9. To stop a timer before it completes, tap the **Delete** button at the bottom of the screen.

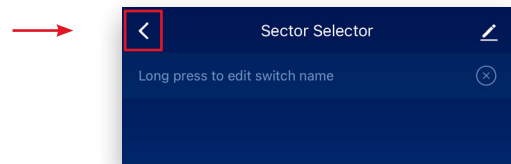

10. To return to the device page, tap the **Back** button in the upper-left corner.

11. Tap the **Back** button in the upper-left corner again.

12. To return to the home page, tap the **Back** button in the upper-left corner.
