

5 Things Netflix Is Showing Church Leaders About the Future...

Questions to ask your church as you move forward:

Because people are now used to viewing things on their own schedule how is your church going to make this available or increase the draw to come to church? (Pod casts, or videoed sermons and worship, small groups, classes etc...)

How can you make online resources as easily accessible as possible? (for seekers and binge watchers)

How will you go about emphasizing the emphasis of mission in your church to get people engaged in being a part of something greater than themselves?

What are some ways you can make story telling more a part of your church life?

In what other ways are you seeing our culture being shifted and shaped? How will you go about staying ahead and engaging people?
