2017 RATES

I like to agree on a fixed price upfront for most projects. However, you might feel that your project would be better off with an hourly rate because of the style of music. Non-lyrical music and soundtracks tend to, just like orchestral and ambient music. Please contact me when in doubt what to do, and I'll have a listen to your mixes. First revisions are free of charge, and so are wav's and mp3's. Just like vinyl premasters and Mastered For iTunes-ready files.
