## Magtek Bullet and USAePay Manual

**Smart 360 POS™**

Using the Magtek Bullet with USAePay encryption is quick and easy!

To begin the set up of your Magtek Bullet, connect the Magtek Bullet to your Smart 360 POS tablet via Bluetooth. To do this, go to the “Settings” application and select “Bluetooth”, making sure it is switched to “On”.

Go to the “Settings” tab and select “Source Keys”.

The screenshot shows the USAePay Merchant Console interface. The browser address bar displays `https://secure.usaepay.com/console/`. The page header includes the date and time: "Thu January 29, 2015 10:54:29 PST" and "Support | USAePay | LogOut". The main heading is "BATCH(OUT)®". Below this, a navigation menu includes "Home", "vTerminal", "Sale Form", "Customers", "Products", "Batches", "Reports", "Search", "Settings" (highlighted with a red circle), and "Fraud Center". A sub-menu for "Merchant Console" is also visible. The main content area features a section titled "Openssl Heartbleed Update" dated "04/11/2014", with a detailed text block explaining the vulnerability and USAePay's response. The bottom of the screen shows an Android-style navigation bar.

The screenshot shows the "Source Editor" page in the USAePay Merchant Console. The browser address bar displays `https://secure.usaepay.com/console/sources`. The navigation menu includes "Home", "vTerminal", "Sale Form", "Customers", "Products", "Batches", "Reports", "Search", "Settings", and "Fraud Center". Below the navigation menu, there are sub-menus for "General", "Users", "Source Keys" (highlighted with a red circle), "Receipts", "Custom Fields", and "Change Password". The main content area is titled "Source Editor" and contains a table with columns: "Source", "Key", "Disabled", and "Pin". The table has one row with the source name "vterm" and a red box around the "Edit" button. Below the table is an "Add Source" button. The bottom of the screen shows an Android-style navigation bar.

You will see all your source keys and Secure Keys. There is always a default Secure key named "vterm". Select edit on vterm, or, if you want to add a new source key, select Add New Source Key. Create a PIN and generate the Secure Key if necessary. Enter these values on the Smart 360 POS application. You are now ready to start using your Magtek Bullet!
