

How to Test SirclePOS on Windows

1. Go to the <https://cloud.genymotion.com/page/launchpad/download/>. You may need to register in order to download Genymotion. After registration download the first link containing virtualbox highlighted below.

The screenshot shows the Genymotion website's download page. The browser address bar displays 'cloud.genymotion.com Genymotion Site - Downloads'. The website header includes the Genymotion logo, navigation links (Discover Genymotion, User Guide, FAQ, Support/Contact, API), and buttons for 'Get Genymotion' and a user profile icon. Below the header, a message states: 'Get a license to use Genymotion for commercial use, or to get access to all features.' A 'Release note' link is also present. The main heading is 'Download ready-to-run Genymotion installer for Windows', followed by a note: 'This version includes Oracle VirtualBox 4.2.12 dependency, so that you don't need to download and install VirtualBox manually'. A download link for 'Windows 32/64 bits (with VirtualBox) v2.3.0' is highlighted with a red underline. Under the heading 'Other platforms and versions', a note says 'These versions need to have Oracle VirtualBox installed to run virtual devices.' A table lists download links for Windows 32/64 bits, Mac OS X 64 bits, Linux 32 bits (Ubuntu), Linux 64 bits (Ubuntu), and Linux Debian 64 bits, all for version v2.3.0. A grey box notes that other Linux distributions (Redhat, Fedora, ...) are not officially supported. A final note states that standard Linux 32/64 bits installers are not compatible.
