MYRBÆRHOLMEN FISHING DOCK

Location: Averøy, Møre og Romsdal
Project: 2008
Client: The National Tourist Routes
Consultant: Norconsult AS

A dock from where one can safely fish in the often-rough seas along the Atlantic road. The dock – which is a stainless steel truss dimensioned to withstand a wave height of 14 meters – is approached from the parking space through a passage cut down in the bedrock.
