

## **Incorporation of the Inherent Rights of the Ocean into the Ocean Conference 2017 “Call for Action”**

The undersigned organizations and our members and supporters worldwide:

NOTING that the ocean covers over seventy percent of our planet, generates over fifty percent of the oxygen, regulates climate, and provides food and jobs for millions of people.

ALSO NOTING that over-fishing, pollution and habitat destruction has led to a global decline in marine biodiversity of 49%, roughly half of what it was 50 years ago;<sup>1</sup>

NOTING that the ocean is the “source of life,”<sup>2</sup> and “marine biodiversity is vitally important for human well-being as it underpins a wide range of ecosystem services on which life depends;”<sup>3</sup>

NOTING that continuing ocean degradation and associated expansion of management challenges together urge heightened regulatory and stewardship initiatives towards achieving ocean health;

FINDING that the lack of a coherent and shared vision of what a healthy ocean looks like, and what our associated relationship with it should be, is an underlying root cause of humanity's failure to implement effective measures to safeguard the health of the ocean.

FINDING that a shared vision of a healthy ocean must reflect the oceans inherent rights to health for its own sake, and must be grounded in values of connection, stewardship and respect for the ocean’s well-being, rather than primarily from the context of the ocean’s utility to humans;<sup>4</sup>

ALSO FINDING that the governance of ocean resources should be guided by principles of sustainability, ecosystem health, precaution, and recognition of the interconnectedness between land and ocean;<sup>5</sup>

RECALLING that the International Union for the Conservation of Nature (IUCN) committed to take action to implement nature’s inherent rights, including the pursuit of “protected area governance systems that achieve the effective and equitable governance of natural resources are recognized (as best practices/ pilot testing), supported and promoted, while respecting the rights of nature”<sup>6</sup> to achieve SDG 14;

RECALLING that UN Resolution 71/232 (“Harmony with Nature,”) “[c]alls for holistic and integrated approaches to sustainable development, in its three dimensions, that will guide humanity to live in harmony with nature and lead efforts to restore the health and integrity of the Earth’s ecosystems;”<sup>7</sup>

<sup>6</sup> IUCN Programme 2017-2020 : approved by the IUCN World Conservation Congress, September 2016, Target 15, Pg. 35, available at: <http://bit.ly/2kkHWCo>

<sup>7</sup> Available at: [http://www.un.org/ga/search/view\\_doc.asp?symbol=A/RES/71/232](http://www.un.org/ga/search/view_doc.asp?symbol=A/RES/71/232)

ALSO RECALLING that the experts' summary report of the first virtual dialogue of the General Assembly on Harmony with Nature<sup>8</sup> recommends that all parties

- “[d]evelop a new, integrate legal perspective and policy framework around rights of nature;”
- “[a]dopt a United Nations resolution endorsing the importance of exploring the potential of Earth Jurisprudence as a framework for developing international, national and local governance systems that will enable human communities to live in Harmony with Nature;” and
- “[w]ork to develop standards for implementation of the rights of Nature for all countries, for example, on the definition of the “health” of an ecosystem or species.”

ACKNOWLEDGING that governments around the world have already begun incorporating nature's rights into their legal systems<sup>9</sup> and over 845,000 people from 122 Countries support UN recognition and adoption of the Universal Declaration on the Rights of Mother Earth;<sup>10</sup>

NOTING that some countries recognize the rights of nature in the context of the promotion of sustainable development;<sup>11</sup>

RECOGNIZING that adopting the inherent rights of the ocean in law and policy will encourage a more holistic approach to ocean governance, the consideration of the impacts of our actions on both current and future generations of systems and people, and more protective and restorative activities, thus maintaining healthy and thriving ocean ecosystems.

OBSERVING that recognition of the inherent rights of the ocean include, but are not limited to, the right to life, the right to health, the right to be free of pollution and the right to continue its vital cycles.<sup>12</sup>

AND NOTING that recognition of the inherent rights of the ocean will advance SDG Goal 14, including targets 14.1, 14.2, 14.2.1, 14.4, 14.5 and 14.C;

1. URGES the Ocean Conference to adopt a “Call for Action” that includes a commitment to recognize and protect the inherent rights of the ocean;
2. URGES UN Oceans to incorporate the rights of the ocean into international treaty law to safeguard biodiversity, including the Marine Biodiversity Treaty for the High Seas and Beyond; and
3. RECOMMENDS the Ocean Conference members and stakeholders adopt a holistic and rights-based approach to ocean governance, including the development and management of marine protected areas.
