

## **Clinical Research Assistant Positions Available**

*Boston University Alzheimer's Disease and CTE Center*

*Boston University School of Medicine*

### **Full-Time Positions- Open to Applications**

#### **Start Dates in May 2018**

**Responsibilities:** We are seeking talented individuals to serve as clinical research assistants at the NIH-funded BU Alzheimer's Disease and CTE Center. There are two openings to work on projects focusing on the diagnosis, prevention, and treatment of Alzheimer's disease (e.g., clinical trials of promising new drugs and diagnostic tests, longitudinal research registry study). Responsibilities include the administration of neuropsychological tests, patient and caregiver interviewing, and participation in diagnostic conferences. Potential for involvement in new research studies, manuscript writing, and grant preparation. Work within a multidisciplinary team of experts in Neuropsychology, Neurology, Neuroimaging, Psychiatry and Nursing.

**Qualifications:** Minimum of a bachelor's degree, preferably with one or more years of experience in a clinical or research setting. Preference will be given to applicants with direct experience administering neuropsychological tests.

#### **2-year Minimum Commitment**

To apply, please e-mail a cover letter and resume to:

Nicole Gullotti, Clinical Core Research Administrator
