Fraser Whineray, Mercury

Fraser joined us in 2008 as GM Generation and was appointed Chief Executive in September 2014. Before joining the company, he was Director Operational Improvement at Carter Holt Harvey and held senior roles in the dairy industry and finance sector, with experience in performance management, strategy, mergers and acquisitions and international business.

Fraser will talk about the role industry has to play in the future of sustainable transport. He will provide insights into how Mercury is promoting the use of electric bikes and vehicles.

Role of industry in sustainable transport

Fraser will talk about the role industry has to play in the future of sustainable transport. He will provide insights into how Mercury is promoting the use of electric bikes and vehicles.
