- ✈ The aerospace industry is part of the AL.CARTS Swiss tradition. AL.CARTS are designed as a “grounded” version of the in-flight service carts used by airlines and flight attendants, who appreciate the ergonomic sleekness and sophisticated design. The aerospace industry is known for stringent quality requirements and product longevity.
- ✈ The stylish, modular design draws on the Swiss custom of capitalizing on design and functionality in one timeless piece.
- ✈ As a result of decades of refinement for the aerospace industry, the aluminum carts are lightweight, green and recyclable. AL.CARTS are made primarily of aerospace grade aluminum machined to exacting tolerances.
- ✈ A piano hinge is an integral part to provide a solid door that is durable and provides a consistent, high quality feel.
- ✈ A powder coating process is used to apply durable colored powder to the surface, making for a sharp finish and ensuring extended longevity and protection from corrosion. Not only that powder coating has little to no environmental footprint compared to other finishing processes.
- ✈ AL.CARTS are available in 12 standard colors. Custom colors and graphics can be easily applied to the side/back panels by the manufacturer or by the end user.
- ✈ The high quality braking system is manufactured through an injection molding process. All four castors are activated by a simple step on the red pedal. A push on the green pedal releases the brakes for instant mobility.
- ✈ Inserts are modular and can be individually purchased, allowing you to customize your AL.CART to precisely fit your needs.
- ✈ The applications of AL.CARTS are endless. With it’s diverse selection of inserts AL.CARTS are modular and versatile, and the carts can be aesthetically tailored to match any branding.

The Beginning...

In 1979 Peter Bucher began manufacturing service carts. In the Swiss heritage of quality and precision Bucher conceived the initial design of AL.CARTS, in-flight service carts to be used by airlines as a drinkbar trolley and to serve meals to passengers during flights.

Changing times...

In the pursuing decades, Bucher Aerospace has become an expert in the manufacturing of In-Flight Service Carts for the Aerospace Industry. As times have changed and airline service has changed; so too has Bucher Aerospace changed. The company now offers the trend-setting vintage in-flight service carts for consumers – bringing the aerospace and airline experience into other industries and personal use.

What used to be for in-flight can now be part of your “ground operation” as the aerospace industry would say. Based on the original Bucher in-flight service cart, the new AL.CARTS are composed of aerospace-grade aluminum. Their architecturally stylish, modular compositions capitolize on the Swiss cultural tradition of elegantly combining form and function.

The right name...

When deciding on a name for the carts, the designers sought inspiration from two distinct sources. The first being from the French word for ordering items separately. – “a la carte”. Which referenced AL.CARTS incredible customizability both through modular inserts and graphical individualization and branding. The second inspiration draws on the chemical symbol for the element Aluminum.

Manufacturing in the Swiss tradition...

AL.CARTS are designed the same way as the carts used by flight attendants who appreciate the ergonomic sleekness and quality of the build. The aluminum carts are light weight, green and recyclable. In manufacturing AL.CARTS, the aluminum components are machined to the same tolerances required in regulated aerospace use.

Factor in the tough powder coat finish, and you end up with a product that remains efficiently functional and undeniably beautiful for years to come.

Assembly of AL.CARTS is proudly done in Everett, WA, USA with the highest precision and regulation that such an industry demands.

Building your custom AL.CARTS...

Begin assembling your own custom AL.CARTS with your color choice. There's a variety of brilliant colors. Then choose the configuration of your cart – with shelves, drawers, open-ended – you pick. Would you like your company logo or own graphic designs, photos or renderings to the side walls of your AL.CARTS? You've got it!

How you can use AL.CARTS...

Airplanes throughout the world have used AL.CARTS, now you can too. Whatever your needs AL.CARTS make a portable and easy to use beverage or storage cart. AL.CARTS can be used as storage in your office, kitchen, shop, garage, or patio. Store and serve food from the cart for catering or cooking. Use as a wine rack or serve beverages at your next social event or party. Office managers will love the versatility with which they can organize the work place and artists have space for their supplies wherever their inspiration leads them.

Limited Warranty

AL.CARTS are warranted to be free of defects in material and workmanship for one year from date of purchase. Customer modifications made to AL.CARTS without Bucher Aerospace's prior written approval or any abuse, misuse or negligence will void the warranty.

Bucher Aerospace will, at our discretion, repair, replace or make appropriate adjustment where our inspection discloses any such defects occurring in normal usage within one (1) year after purchase.

IMPLIED WARRANTIES INCLUDING THAT OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE EXPRESSLY LIMITED IN DURATION TO THE DURATION OF THIS WARRANTY. SELLER DISCLAIMS ANY LIABILITY FOR SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES.

Some states/provinces do not allow limitations on how long an implied warranty lasts, or the exclusion or limitation of special, incidental or consequential damages, so these limitations and exclusions may not apply to you. This warranty gives you specific legal rights. You may also have other rights which vary from state/province to state/province.

Pricing

Pricing is subject to change. Please request current pricing at the time of placing an order.
