Planting SEEDS for Success

Supporting and Empowering Educational and Developmental Services (SEEDS) is a multi-disciplinary intervention program composed of schools, community and family representatives. The primary goal of SEEDS is to provide support for children birth through third grade and their families so they are ready for kindergarten, promoted at school year end, and reading on level by third grade. These goals are achieved by working with the family to support the child’s developmental, educational, and social needs so they are successful at home, school, and in the community.

Services and Resource Links Provided:
