

Special Notes:

Our Macaroons have a crunchy exterior. Once individually wrapped, the exterior tends to soften but will remain moist & chewy inside. They will remain crispy if not wrapped. Oat Cakes may discolor & dry out if not individually wrapped. Chocolate and Pumpkin Cream Cheese Cupcakes tend to dry out if not individually wrapped.

Our 9x9 inch perforated saran wrap is a perfect & easy solution to your wrapping hassles. It is \$20.00 & we will be happy to send it with your next order. We also have a 12x12 inch saran wrap available.

Ultimate Cookie offers a variety of eye catching display pieces. Please contact our helpful staff for the display that best fits your needs.

**PRODUCT
SHELF LIFE
&
HANDLING
INSTRUCTIONS
2017**

General Handling Information:

Upon receipt of our products, we recommend freezing any products which will not be put out for sale immediately. Scoring bars & brownies is recommended instead of cutting when product is not to be used right away. Bars should not be sliced until ready to be put on shelf. Products should then be individually wrapped or displayed in an enclosed case or jar. We recommend freezing rather than refrigeration.

Chocolate Dipped Products & Chocolate Frosted Products: In order to avoid blooming of chocolate (discoloration), do not refrigerate dipped or frosted products. Blooming will occur less frequently in the freezer.

Shelf Life:

Listed below are the recommended number of days that products should be left out for sale (this is upon receipt of product or after thawed from freezer). Once again we highly recommend individually wrapping all products or displaying in enclosed case or jar. If you receive our product via UPS, you must deduct the shipping time from the shelf life. When refilling cookie jars, crates, cases, etc., make sure you rotate the product so the older product is the most easily accessible.
