

Exprodo SDM has been specifically created to allow researchers or clinical trial units to store their study data in a bespoke, web-accessible database. Exprodo SDM allows the user to:

- Share access to data across multiple sites in a web browser.
- Control who can see or modify which data.
- Organise your study, your data and their collection.
- Monitor progress of projects both individually and collectively.
- Work effectively with either clinical trials with a multi-site marketing study with thousands of subjects or a one centre study with just a few participants.

Comprehensive Research Data Support

Custom Workflows and Data Customisation

Standardise Processes for each Subject

Display Data in the Format You Want

Automated Tracking of Tasks for all Subjects

Fully Flexible Permissions System

Exprodo SDM is easy to use with great flexibility in analysis and reporting. This allows you to look at the data in the way you want whilst managing your budget and timescales.
