

Boston March 5th 1871

John A Thomson Esq.

Dear Sir,

I received your articles on money and have read them. But I do not agree with you in your theory. Last year I mailed for you in one or two pamphlets on currency - Did you receive them? In them I discussed somewhat the nature of money. I intend to discuss it more fully in still another pamphlet. I think the writers on currency know very little about it.

I also mailed for a you a book entitled "The Trial by Jury." Did you receive it?

I enclose with this two copies of a letter of mine to Charles Francis Adams. I shall be pleased if you could get it copied into some of your papers.

_____ your give me the reasidence of Charles F. Faulkner?

~~How is it that the Southern people take no more interest in discussions in regard to man's rights in political society? They seem to settle down into slavery, with perfect content. Or else they are looking forward to the time when the, with their confederates, may get the power into their hands, and make slaves of others, as others now make slaves of them. They exhibit no inclination or desire whatever for any system that shall be just towards every body. They seem determined either to make slaves of others or to be slaves themselves.~~

I never found the book you spoke of.

Yours truly

Lysander Spooner
