

# Modernize.

Patients are your first priority. Our goal is to help you maximize your time with them by modernizing your healthcare IT systems. We understand every system is unique and change can be difficult. This is why we're experts at guiding and transforming your system into an efficient, flexible, and scalable solution. The result: lower costs, less paperwork, and more time to focus on what matters – your patients.

# Case Study

## Department of Mental Health and Hygiene

### The Challenge

*With the landscape of healthcare fundamentally shifting, the DHMH needed their IT system to remain in compliance with new regulation. There are over 30 administration departments at the DHMH, all of which need to share a central framework, yet have their own unique IT challenges.*

### Our Solution

*Utilizing our partners at Cognosante we were able to capture the DHMH's existing systems, retaining their vital business related processes. In doing so we provided solutions to not only bring it to compliance, but make the system itself more efficient. We understand flexibility is essential, so assuring the system was able to expand and adapt to future regulatory changes was our priority.*

## Our Clients

- Department of Mental Health and Hygiene (DHMH)
- Baltimore Department of Health
- National Institute of Health
- Maryland State Department of Education (MSDE)

“ BITHGROUP Technologies provided implementation services, technical expertise and project management support on one of our organization's largest and most strategic projects. Dr. Wallace and his staff consistently held professionalism, teamwork and customer service in the highest regard.”

*Lisa D. Price, PMP  
Director Enterprise Project Management Office  
Prince George's County Public Schools*
