Case Study

Baltimore County Public Schools

The Challenge

At School District (BCPS) over 700 Employees were audited and needed to be re-fingerprinted within a 30 day timeframe. To do that BCPS would need a solution to have fingerprint and background check services efficiently and effectively at various satellite locations.

Our Solution

Due to the urgency of the client's needs, our mobile services offered additional CJIS certified team members to over 11 satellite location sites. Alongside offering extended office hours, we temporarily offered an additional full operation location and provided expedited service, which sets appointment times at 15 minutes or less.
