NASRC Brings Commercial Track to IIAR Conference & Expo

March 3-6, 2019  •  Phoenix, Arizona

Introducing the **NEW commercial track** at the 2019 IIAR Conference & Expo, featuring valuable educational sessions, in-depth technical presentations, and new material unlike any other industry event. Gain insight into the groundbreaking trends that will shape the future of commercial refrigeration.

You won't find this combination of **product exhibitions, networking opportunities, and technical content** anywhere else! Topics include:

- Comparison of Natural Refrigerant Commercial Systems
- Examination of the True Cost of Natural Refrigerant Systems
- Emerging Trends in Commercial Refrigeration
- Supermarket Experiences with Ammonia Systems
- Case Study of The Nation’s Only Propane Rack System
- Recommendations to Reduce Fire Hazard of Class A3 Refrigerants
- Using Incentives to Drive the Adoption of Natural Refrigerants
- Expanding CO2 Refrigeration with New Technologies

- Analysis of Trends Influencing the Future of Commercial Refrigeration
- Ammonia Systems for Supermarkets: End-user Experiences
- Commercial Heat Exchangers: Applications in Commercial System Evaporators, Condensers, and Gas Coolers
- Commercial Service Readiness: Challenges and Solutions in the Commercial Sector
- Barriers, Solutions, and Progress of Commercial Refrigeration Codes & Standards
- Rackless Systems: Are Alternatives to Rack Systems the Future of Commercial Refrigeration?
