

Step Code Airtightness Training

Be Prepared for the New Step Code Airtightness Standards

Mobile Step Code Training Classes Are Coming to a Location Near You

Change is coming! We want to help you be ready to meet the new step code standards with Small Planet Supply's new airtightness training course. Over 300 people have already attended an earlier version of this workshop at British Columbia Institute of Technology's (BCIT) Burnaby campus.

Until now our classes have been difficult for many in the province to attend. Thanks to a newly received grant, we have built a mobile training lab and are holding classes throughout the region from October 2018 to April 2019. We have also been able to reduce the cost of the class from \$350 to \$250 for all participants who attend the classes and we are also reducing the rate for those who attend the training at BCIT's Burnaby campus.

At the workshop you will:

- ▶ Learn what an air barrier is and how to define it in your project
- ▶ Have a hands-on opportunity to make air barriers and experiment with different air-sealing materials to get a deep understanding of how each of the materials can be used to create airtight buildings.

Participants will also earn 6 CPD credits upon completions of the course. Classes will be held on Saturdays from 9:00 am to 5:00 pm.

Mobile classes are limited to 12 participants, so you won't want to wait if you want to attend a class near you.

Workshop Locations

- ▶ BCIT Burnaby
- ▶ Kamloops
- ▶ Kelowna
- ▶ Kimberley
- ▶ Langley/Maple Ridge/Chilliwack
- ▶ Nanaimo
- ▶ Nelson
- ▶ Penticton
- ▶ Prince George
- ▶ Sechelt
- ▶ Squamish/Whistler
- ▶ Victoria
