#### Has Two Beaches.

The island contains a sandy cove for swimming beginners and a lake front for experienced ones. Many canoes and rowboats with which the camp is equipped, will be used by the latter. There is a large and ornate boathouse.

Paths through the woods lead to the various buildings and points of interest, including a large Adirondack shack equipped with glass-enclosed dining porches and furnished with Oriental rugs and other trappings, a picnic point and tennis court. The main buildings are equipped with electricity and plumbing. A large kitchen is in a separate structure. The island is less than half a mile from land and can be reached by a large launch. The camp is also equipped with a speedboat. A caretaker who has been on the site many years will remain.

Dedication of the new site will be held in the fall, it was said. Council officials, including Mrs. Campbell, Miss Hazel Chapman, national staff councillor, and Miss Katherine Hammett, national camp adviser; Miss Mary E. Chidlaw, council director, and Mrs. J. Franklin Perry, local councillor, inspected the site recently.

Plans are now in progress to transport groups of girls from the Oranges and Maplewood to the camp, at a reduced rate during the camping season.

Arrangements are also being made to lodge those who will be unable to go, at the Montclair Girl Scouts camp in Stokes State Park or in another local camp.
