

Kristen R. Hermansen-Ryan, D.D.S., F.A.G.D.

Welcome to Central City Family Dental! We are pleased you have chosen us for your dental health care. We have a very enthusiastic team that is very knowledgeable about the high quality care that we provide. Through a combination of continuing education and state of the art facility and equipment, we are able to offer you and your family the high level of care you are looking for, in a pleasant and relaxed environment. Our friendly & fun staff, warm office, and caring attitude will put you at ease when you come into our office.

As a new patient, we would like to share our approach to service. We realize you may have questions regarding our specific dental practice, office policies, insurance, and fee structure, so feel free to call our office and speak to Laurie or Nancy if you have any questions.

**Preventive dentistry and maintenance of a healthy dentition is our goal for every patient.** This involves daily dental hygiene, proper nutrition, periodic cleanings and check-ups. It may not be where we start with every new patient, but that is what we want to attain and maintain, especially with all the evidence linking dental health to overall health!

Our office is a family centered comprehensive general dental practice. We treat patients from 1 year of age up to 104 years of age. Services that we offer include fillings, crowns, full or partial dentures, implants, implant crowns or bridges, orthodontics, pediatric dentistry, preventative care, periodontic care, extractions, TMD therapy, and more. Our goal is for you to keep your natural teeth for as long as possible. If it is not possible for you to keep your natural teeth in a healthy state, we will work to restore your mouth to optimum health.

In this packet you will also find our new patient forms. Please bring these, along with your insurance card, to your first appointment. NOTE: Please bring all current x-rays from your previous dentist (including bitewings taken within the last year and panoramic x-rays taken within the last 5 years). We need current x-rays to complete a thorough exam; therefore, if x-rays are not available – new ones will need to be taken. Also, if you take a pre-medication before dental appointments, please let us know so that Dr. Ryan can review this information and prescribe any needed medication.

We are very excited to meet you at your first appointment. See you then!

Sincerely,

Kristen R. Hermansen-Ryan, D.D.S.
