

Stardust

Maxing out an American Blackface amp is truly an experience to remember. The harmonics and dynamic response are uncomperable. Blackface Stardust is designed to sound and respond exactly like that. Set gain and tone and then control everything from your guitar. Sparkly clean to crunchy mean are all there.

Controls:

Gain: Controls the amount of gain and low to medium frequencies for a heavier distorted sound. V2 features a wider gain range. Lower gain sounds, clean boost to semi dirty are now available. We have also improved bass response on lower gain settings for a fuller sound.

Tone: Acts like a presence control. Brighter and rich in harmonic overtones as you turn clockwise.

Volume: Set the overall volume of the effect.

Built with the highest quality components available, features true bypass and operates with 9V battery or external 9-18V DC regulated power supply (- center, + ring). Max current consumption 3.4mA. Using a power supply of +20V DC may cause severe damage to the pedal and void warranty.

Warranty: Blackface Stardust comes with 5 years warranty for all internal parts.
