Products November 2012

Our pages show a fantastic array of products as seen at various events during the recent London Design Festival, as well as a few items showing at the forthcoming ORGATEC, 23-27 October. All of the items featured in the following pages can also be found in the Products section of iconeye.com

Darragh Casey Design Designersblock

Silvia's Back shelf by Darragh Casey is a product of his MA project, *Silvia's Body*, and was recently on show during Designersblock. The project aimed to reconsider the idea of the user and incorporate the figure into the design of a shelf in unusual, thought-provoking ways. Silvia's Back shelf is a domestic shelving solution designed around the side profile of Casey's girlfriend, Silvia Garcia Denche. Casey created a plywood former that could accurately form plywood to the exact proportions of her head and back.

Dare Studio

100% Design & designjunction

Launched during London Design Festival and designed by Sean Dare to complement Dare Studio's Hardy wingback collection as a low back option, the Bronte sofa has a sumptuous fixed seat and an invitingly soft aesthetic. Available in a variety of leathers and fabrics, the sofa features a rounded horseshoe back and beautifully tapered solid timber legs, in either American black walnut or oak.

Wobedo Design Designersblock

Wobedo Design's decorative sound absorbers are perfect for contract projects as well as homes. The Woolbubbles, pictured, and the graphic and sharp Squarebubbles have shown some of the best results among wall panels in sound absorption tests. Wobedo Design's vision is not only to create a better and more balanced acoustic environment in the workplace, but also that their products will enhance the beauty of the interiors and add harmony.

Glassolutions 100% Design

TEX glass is a laminated glass product from Glassolutions, with a wide range of beautiful fabrics from the Nya Nord collection encapsulated inside. The product can be used to create dramatic features in interior applications such as partitions, screens, doors and furniture, especially when combined with either back-painted or mirrored glass. Because the fabric is encased by glass, it is well protected and easy to clean.

perludi

100% Design

AMBERintheSKY is an innovative bunk bed, characterised by aesthetic and workable design and high-quality natural materials such as birch wood and 100 percent wool fabric, in a variety of colours. Standing at 135cm AMBERintheSKY is the lowest available bunk bed worldwide, making the upper bunk easier to access for younger children. The low height also means parents can easily kiss their children good night. The lower level is always variable, so can be converted to a pedestal, cozy corner or a homemade cave, fulfilling all the playing needs children have.
