

OUTCOME	INDICATOR	NOTES	DATA SOURCE	FREQUENCY	COUNCIL SUGGESTION	STAFF NOTES
A. School success is a reality for all children and youth	1) % of children (ages 0-5) enrolled in high-quality early care and education settings	Early care and education settings include licensed child care centers and family child care programs. High-quality is defined as scoring a 5.0 or higher on the Infant/Toddler Environment Rating Scale or the Early Childhood Environment Rating Scale.	First 5 San Francisco	TBD		
A. School success is a reality for all children and youth	2) % of SFUSD students ready for Kindergarten	Students who attended an SFUSD pre-k for a full year and were assessed with the Desired Results Developmental Profile (DRDP) and the Phonological Awareness Literacy Screening (PALS) as Kindergarten ready.	SFUSD/Early Education Dept.	Annually		
A. School success is a reality for all children and youth	3) % K-12 SFUSD students attending school regularly	>90% attendance	SFUSD	Annually		
A. School success is a reality for all children and youth	4) % of SFUSD students (gr 3-8 and 11) proficient or above in English Language Arts and Math in elementary and middle schools		SFUSD/Smarter Balanced Assessment Consortium (SBAC)	Annually		
B. Youth succeed in post-secondary paths and careers	5) % of SFUSD 12th graders graduating UC/CSU eligible	Completion of A-G courses with a grade of C or better.	SFUSD	Annually		
B. Youth succeed in post-secondary paths and careers	6) % of all SFUSD college attendees who complete a degree within six years	Calculated for each graduating cohort from SFUSD.	SFUSD/National Student Clearinghouse	Annually	Include industry certificates if possible.	Following up with SFUSD to see if it'd be possible to collect this data.
B. Youth succeed in post-secondary paths and careers	7) % of youth ages 18-24 enrolled in school or work		American Community Survey IPUMS data	Annually	Add a dimension of earnings/wages or on a career pathway, if possible.	May not be possible with data source, but perhaps explore a qualitative dimension (ie. focus group with City College or SF State students from SF).

OUTCOME	INDICATOR	NOTES	DATA SOURCE	FREQUENCY	COUNCIL SUGGESTION	STAFF NOTES
C. Children and youth are physically and emotionally healthy	8) % of SFUSD students (gr 5, 7 and 9) who have a healthy body composition	Healthy body composition among 5th, 7th, and 9th grade public school students is defined when a student has a body fat percentage OR a body mass index that falls within a "Healthy Fitness Zone" (HFZ) as defined through The Cooper Institute's FITNESSGRAM protocol. HFZ for body composition are defined using criterion-referenced, age-specific standards.	California Dept. of Education/Physical Fitness Test	Annually		
C. Children and youth are physically and emotionally healthy	9) % of children (ages 2-11) who visited the dentist within the last six months	Survey sample for San Francisco is not large enough to reliably disaggregate.	UCLA Center for Health Policy Research, California Health Interview Survey	Every 2 years		
C. Children and youth are physically and emotionally healthy	10) % of SFUSD students (gr 5-12) who feel close to people at school	Survey question administered to students at school. Survey was field tested in 2014-2015 and public results will be available districtwide in September 2016.	SFUSD/CORE Student Survey	Annually beginning September 2016		
D. All families are economically secure	11)% of families with children who meet the Self-Sufficiency Standard	Measures income needed for a family of a certain composition living in a particular county to adequately meet minimal basic needs. It is based on the costs families face on a daily basis – including housing, food, child care, out-of-pocket medical expenses, transportation, and other necessary spending.	Insight Center for Community Economic Development; American Community Survey PUMS data	Every 2 years		
E. All families have a safe and nurturing environment for their children	12) Rates of children experiencing child maltreatment	Substantiated (confirmed) rates of child maltreatment.	UC Berkeley and the California Dept. of Social Services, California Child Welfare Indicators Project	Annually		

OUTCOME	INDICATOR	NOTES	DATA SOURCE	FREQUENCY	COUNCIL SUGGESTION	STAFF NOTES
E. All families have a safe and nurturing environment for their children	13) % of mothers receiving prenatal care in the first trimester		California Dept. of Public Health/Birth Records	Annually		
E. All families have a safe and nurturing environment for their children	14) % of stably housed families and young adults	Calculated by subtracting the number of homeless and the number of overcrowded families/youth ages 18-24 from total number of families/youth ages 18-24. Households are considered crowded if they have more than one person per room. A room includes whole rooms used for living purposes (Includes bedrooms, kitchens, etc. Excludes bathrooms, porches, balconies, foyers, halls, unfinished basements, etc.). The sample size of homeless families and youth surveyed is not large enough to reliably disaggregate.	San Francisco Homeless Point-In-Time Count and Survey and American Community Survey PUMS data	Homeless Point-In-Time Count and Survey is every 2 years; Overcrowding can be calculated annually	Also capture the the condition and/or predictability of housing.	Perhaps a question or two could be added to the Controller's City Survey to probe these concepts?
E. All families have a safe and nurturing environment for their children	15) % of families who report feeling safe in their neighborhoods	Controller's City Survey calculated using percent of residents who feel safe while walking alone in neighborhood during the day and at night. OCOF has requested data breakdown by families with children/youth.	Controller's City Survey	Every 2 years		
E. All families have a safe and nurturing environment for their children	16) # of youth impacted by the juvenile justice system	Juvenile probation referrals: all cases referred to the probation department for purposes of screening.	San Francisco Juvenile Probation Dept. Statistical Report	JPD: Annually	Broaden to include children of incarcerated parents	Could be broadened to include referrals to JPD and the number of children with parents in SF County Jail (although would be duplicated). In October 2014, the SF Children of Incarcerated Parents Partnership worked with the Sheriff's Department to distribute a brief survey to all individuals incarcerated within the SF jail. It is possible this survey will be repeated in the future.

OUTCOME	INDICATOR	NOTES	DATA SOURCE	FREQUENCY	COUNCIL SUGGESTION	STAFF NOTES
F. All children, youth and families aim to thrive	17) % of families and % of children ages 0 to 24 who choose to participate in services and programs that foster their development	The definition of this indicator would need to be developed. Data would be required and integrated from various city and school district departments. Possible services/programs could include: Family Resource Centers, family engagement, mental health, recreation/sports, out of school time, extracurricular, youth leadership, teen enrichment, mentoring, workforce development, violence prevention, and wellness programs.				
SUGGESTIONS FOR ADDITIONAL INDICATORS/POSSIBLE SUPPORTING INDICATORS FROM SEPT 10 MEETING						
A. School success is a reality for all children and youth	SFUSD enrollment trends and participation in school choice	One suggestion was to track SFUSD enrollment rates. Another suggestion was to track proactive participation in SFUSD's school choice program.	SFUSD	Annually	x	
B. Youth succeed in post-secondary paths and careers	% of San Francisco high school graduates that can remain in the city to live/work as adults				x	Not currently tracked
C. Children and youth are physically and emotionally healthy	% of TAY accessing health services	Suggestion was generally for an indicator related to TAY health.			x	Would be difficult to track this. Alternative could be to explore TAY enrollment in Healthy SF.
C. Children and youth are physically and emotionally healthy	% of youth who feel close to people in their neighborhoods (or some measure of social/emotional connections in neighborhoods to capture community networks)				x	Data not currently available. Could explore asking SFUSD to add a question to student survey

OUTCOME	INDICATOR	NOTES	DATA SOURCE	FREQUENCY	COUNCIL SUGGESTION	STAFF NOTES
C. Children and youth are physically and emotionally healthy	Amount of time being physically active	<p>CHKS's Physical Health & Nutrition Module has questions on physical activity. The survey of Elementary school students in 2012-2013 included questions on physical activity and exercise.</p> <p>CHIS has two variables on physical activity:</p> <ul style="list-style-type: none"> -Not including school PE, on how many days of the past 7 days was (CHILD) physically active for at least 60 minutes total -During a typical week, on how many days is (CHILD) physically active for at least 60 minutes total per day? Do not include PE. It is likely that the sample size is not large enough to disaggregate by subgroup 	SFUSD/California Healthy Kids Survey/Physical Health & Nutrition Module OR California Health Interview Survey	CHKS is every other year; CHIS is annually	x	Would suggest using SFUSD/California Healthy Kids Survey data since it will be available by subgroups.
C. Children and youth are physically and emotionally healthy	Amount of time spent outdoors	CHIS has a question on park use. Sample size is likely not large enough to disaggregate by subgroup	California Health Interview Survey	Annually	x	
D. All families are economically secure	Employment status of parents/caregivers		IPUMS ACS		x	
E. All families have a safe and nurturing environment for their children	Amount of time families spend visiting parks	CHIS has a question on park use. Sample size is likely not large enough to disaggregate by subgroup. Controller's City Survey also has questions about city park usage.	California Health Interview Survey OR Controller's City Survey	CHIS is annually; Controller's survey is every other year	x	
E. All families have a safe and nurturing environment for their children	Housing affordability	Housing burden would measure the percent of renters and owners spending more than 30 percent of annual household income on housing costs.	IPUMS ACS	Annually	x	

OUTCOME	INDICATOR	NOTES	DATA SOURCE	FREQUENCY	COUNCIL SUGGESTION	STAFF NOTES
E. All families have a safe and nurturing environment for their children	% of housing units being built in the city that can accommodate families	This indicator would be an attempt at measuring how many new units can accommodate families.	City Planning Development Pipeline database?	Quarterly	x	Needs further investigation with City Planning. They have a Development Pipeline database but need to see if they have the level of detail to capture number of rooms/unit. Need to clarify definitions of housing that can accommodate families.
F. All children, youth and families aim to thrive	% of SFUSD students experiencing youth leadership opportunities	Capturing meaningful opportunities to contribute.			x	SFUSD does not currently administer the Resilience & Youth Development Module of the California Healthy Kids Survey, which has questions related to this.
F. All children, youth and families aim to thrive	% of families who report they have adequate information about city/district services available to them	Suggestion was generally about communication with families.			x	Could explore adding a question to the Controller's City Survey
F. All children, youth and families aim to thrive	% of parents/caregivers who have 21st century literacy skills	Special interest in linguistic disparities in technology access			x	National Assessment of Adult Literacy estimates 113,000 adults in SF in 2003 were "below basic literacy." No updated or disaggregated data is available from NAAL. According to the Library, about 30,000 adults receive literacy services through City College or Project Read. Would need to identify a data source to track such an indicator.
