<b>DRAFT GOALS</b>				
<i>We ensure that all children, youth and transitional age youth, especially those most in need, ...</i>				
		A. succeed in school		
		B. succeed in post-secondary and/or careers paths		
		C. are physically, emotionally, and mentally healthy		
<i>We ensure that all families and young adults, especially those most in need, ...</i>				
		D. attain economic security <b>and housing stability</b>		
<i>We ensure that all families, especially those most in need, ...</i>				
		E. live in a safe and nurturing environment for their children		
<i>We ensure that San Francisco...</i>		<b>F. remains vibrant due to its diverse families</b>		

<b>DRAFT MEASURES OF SUCCESS</b>				
<i>(Measurable proxies to inform progress toward our goals)</i>	<b>LINKED GOALS</b>	<b>DEFINITION &amp; NOTES</b>	<b>DATA SOURCE</b>	<b>FREQUENCY</b>
1) % of children (ages 0-5) enrolled in high-quality early care and education settings	A, E	Early care and education settings include licensed child care centers and family child care programs. High-quality is defined as scoring a 5.0 or higher on the Infant/Toddler Environment Rating Scale or the Early Childhood Environment Rating Scale. Measure would likely rely on Quality Rating & Improvement System (QRIS) in the future.	First 5 San Francisco	TBD
2) % of Kindergarteners ready for Kindergarten	A	SFUSD's current definition: Students who attended an SFUSD pre-k for a full year and were assessed with the Desired Results Developmental Profile (DRDP) and the Phonological Awareness Literacy Screening (PALS) as Kindergarten ready.	SFUSD/Early Education Dept.	Annually

<i>(Measurable proxies to inform progress toward our goals)</i>	<b>LINKED GOALS</b>	<b>DEFINITION &amp; NOTES</b>	<b>DATA SOURCE</b>	<b>FREQUENCY</b>
3) % K-12 students attending school regularly	A, C, E	Defined as greater than 90% attendance. Data currently available for SFUSD students only. Interest in systems-integrated subgroups such as students who live in public housing, whose families are enrolled in CalWORKS, participate in city-funded afterschool programs, receive city-funded mental health services, etc.	SFUSD	Annually
4) % of students proficient or above in English Language Arts and Math in elementary and middle schools	A, C	Data currently available for SFUSD students only.	SFUSD/Smarter Balanced Assessment Consortium (SBAC)	Annually
<b>5) % Kindergarteners with dental cavities</b>	C	Defined as % of children who have experienced cavities (or tooth decay) in their primary or permanent teeth. Data currently available for SFUSD students only.	SFUSD/Oral Health Screening Program	Annually
6) % of children and youth who have a healthy body composition	C, D	<b>For preschoolers participating in Preschool for All, defined as not identified as at risk of obesity (rapid BMI gain, overweight or obese).</b> For 5th, 7th, and 9th grade SFUSD students, defined when a student has a body fat percentage OR a body mass index that falls within a "Healthy Fitness Zone" as defined through The Cooper Institute's FITNESSGRAM protocol, used by California Dept of Education.	Preschoolers: San Francisco Child Care Health Project. SFUSD students: California Dept. of Education/Physical Fitness Test	Annually

<i>(Measurable proxies to inform progress toward our goals)</i>	<b>LINKED GOALS</b>	<b>DEFINITION &amp; NOTES</b>	<b>DATA SOURCE</b>	<b>FREQUENCY</b>
<b>7) % of children, youth, and transitional age youth who have not experienced trauma or toxic stress*</b>	C	Trauma or toxic stress is defined as experiencing 2 or fewer traumatic events that can disrupt brain and nervous system development and increase risk for diseases, cognitive impairment and behavior problems. Traumatic events include: extreme economic hardship, living with someone who has a substance problem, being a victim or witness of neighborhood violence, living with someone who is mentally ill/suicidal, witnessing domestic violence in the home, parent serving time in jail, death of a parent, family disorder leading to divorce/separation, or being treated unfairly due to race/ethnicity. National survey has data available for children ages 0 to 17. Would need to identify a way to track for TAY.	2011-12 National Survey of Children’s Health	unknown
<b>8) % of children, youth, and transitional age youth who report having a caring adult in their lives*</b>	C, A	Data currently only available for SFUSD students in grades 5, 7, and 9. Student report there is an adult at school who really cares about them. Survey question administered to students at school.	California Healthy Kids Survey for SFUSD (Core Module Q 35)	every other year
9) % of 12th graders graduating high school	A, B, C	SFUSD requires students to meet UC/CSU eligibility requirements to graduate. Data currently available for SFUSD students only.	SFUSD	Annually
<b>10) % of SF high school graduates who attend college and complete a degree or certificate within six years</b>	B	Calculated for each graduating cohort from SF high schools. Data currently available for SFUSD students only.	SFUSD/National Student Clearinghouse	Annually

<i>(Measurable proxies to inform progress toward our goals)</i>	<b>LINKED GOALS</b>	<b>DEFINITION &amp; NOTES</b>	<b>DATA SOURCE</b>	<b>FREQUENCY</b>
11) % of youth ages 18-24 enrolled in school or work a <b>living wage job</b>	B, C	<b>To ensure we are capturing jobs that foster self-sufficiency, we would need to determine a wage/income threshold for this measure.</b>	American Community Survey IPUMS data	Annually
12) % of mothers receiving prenatal care in the first trimester	C, E		California Dept. of Public Health/Birth Records	Annually
13)% of families with children <b>and young adults</b> who meet the Self-Sufficiency Standard <b>(which is an alternative to the federal poverty level adjusted for local cost of living)</b>	D	Measures income needed for a single adult or family of a certain composition living in SF to adequately meet minimal basic needs. It is based on the costs families face on a daily basis – including housing, food, child care, out-of-pocket medical expenses, transportation, and other necessary spending.	Insight Center for Community Economic Development; American Community Survey PUMS data	Every 2 years
14) % of stably housed families and young adults	D, E	Calculated by subtracting the number of homeless and the number of overcrowded families/youth ages 18-24 from total number of families/youth ages 18-24. Households are considered overcrowded if they have more than one person per room. A room includes whole rooms used for living purposes (Includes bedrooms, kitchens, etc. Excludes bathrooms, porches, balconies, foyers, halls, unfinished basements, etc.). The sample size of homeless families and youth surveyed is not large enough to reliably disaggregate. <b>Interested in also capturing families and young adults in SROs, if reliable data is made available.</b>	San Francisco Homeless Point-In-Time Count and Survey and American Community Survey PUMS data	Homeless Point-In-Time Count and Survey is every 2 years; Overcrowding can be calculated annually

<i>(Measurable proxies to inform progress toward our goals)</i>	<b>LINKED GOALS</b>	<b>DEFINITION &amp; NOTES</b>	<b>DATA SOURCE</b>	<b>FREQUENCY</b>
15) Rates of children experiencing child maltreatment	E, C	Substantiated (confirmed) rates of child maltreatment.	UC Berkeley and the California Dept. of Social Services, California Child Welfare Indicators Project	Annually
16) # of youth impacted by the juvenile justice system and/or have incarcerated parents*	A, E	The # of youth impacted by juvenile justice system is defined as all juvenile probation referrals (all cases referred to the probation department for purposes of screening). The # of youth that have incarcerated parents is defined as those SF Jail inmates who respond to a survey indicating the number of youth for which they are a primary caregiver.	San Francisco Juvenile Probation Dept. Statistical Report, and Kramer, K., et al. Descriptive Overview of Parents, Children and Incarceration in Alameda and San Francisco County Jails. Alameda County Children of Incarcerated Parents Partnership & San Francisco Children of Incarcerated Parents Partnership. Zellerbach Family Foundation, (June 2015).	JPD: Annually; Survey of SF Jail: TBD
17) % of families who report feeling safe in their neighborhoods	E	Percent of parents who report they feel safe while walking alone in neighborhood during the day and at night.	Controller's City Survey	Every 2 years
18) % change in demographics of families in SF (by race/ethnicity and socio-economic status)	F	Trend data on percent and number of families of different race/ethnic composition and socio-economic status living in SF.	American Community Survey IPUMS data	Annually

<i>(Measurable proxies to inform progress toward our goals)</i>	<b>LINKED GOALS</b>	<b>DEFINITION &amp; NOTES</b>	<b>DATA SOURCE</b>	<b>FREQUENCY</b>
<b>DRAFT Contributing Measures to Track</b>				
a) % of children (ages 0-5) who receive developmental screenings	A & E	Developmental screenings are brief assessments designed to identify children who should receive more intensive diagnosis or assessment for developmental delays so that they receive the services and supports they need early on. Screenings can help assure that some conditions do not escalate into life-affecting conditions later on in life.	First 5 SF	Annually
b) % of families who read to their children ages 0-5 every day	A & E	CHIS question: In a usual week, about how many days do you or any other family members read stories or look at picture books with (CHILD)?	California Health Interview Survey	Annually
c) % of children and youth offered arts, physical education, and STEM opportunities in elementary and middle schools*	A	<i>Would need to develop a way to measure</i>		
d) % of children and youth who have access to expanded learning opportunities during the school year and summer*	A & E	Data currently only available for K-8 students citywide. Data not currently compiled for HS students.	DCYF collects citywide estimates	Annually
e) % of children and youth not missing instructional time due to behavioral issues*	A & C	Data currently only available for SFUSD students. Defined as students who are not expelled, suspended or referred out of the classroom for behavioral issues.	SFUSD	TBD
f) % of SFUSD graduates who enroll in college within 4 years	B	Defined as enrollment any time during the first two years after high school.	SFUSD/National Student Clearinghouse	Annually
g) % of high school graduates that can remain in the city to live/work as adults*	B	<i>Would need to develop a way to measure</i>		

<i>(Measurable proxies to inform progress toward our goals)</i>	<b>LINKED GOALS</b>	<b>DEFINITION &amp; NOTES</b>	<b>DATA SOURCE</b>	<b>FREQUENCY</b>
h) % of children born at healthy birth weight	C	Defined as weighing at least about 5.5 pounds or more at birth.	California Dept. of Public Health, Center for Health Statistics, Birth Statistical Master Files	Annually
i) % of children that had 2 or more doctor visits in the last year	C	Data available for children ages 12-17. CHIS question: During the past 12 months, how many times has (CHILD) seen any kind of medical doctor?	California Health Interview Survey	Annually
j) % of children and youth who are physically fit	C	Data currently only available for SFUSD students in grades 5, 7, and 9. Defined as meeting 5 of the 6 to fitness areas evaluated (body composition, aerobic capacity, flexibility, abdominal strength and endurance, trunk extensor strength and flexibility, and upper arm strength and endurance) on the Cooper Institute's FITNESSGRAM protocol.	California Dept. of Education/Physical Fitness Test	Annually
k) % of children, youth and transitional age youth accessing publicly funded mental health services*	C	<i>Would need to develop a way to measure</i>		
l) % of high school age youth who report experiencing symptoms of depression in the previous year	C	Data currently only available for SFUSD students.	California Healthy Kids Survey for SFUSD	Every other year
m) % of unemployed parents receiving job training*	D	<i>Would need to develop a way to measure</i>		
n) % of families not spending 50% or more of income on housing	D	Defined as percent of annual spending on renting and/or owning primary residence.	American Community Survey IPUMS data	Annually
o)% of families that feel their housing situation is stable for the foreseeable future*	D	<i>Would need to develop a way to measure</i>		
p) % of families not living in concentrated poverty	E	Estimated percentage of children ages 0-17 living in areas of concentrated poverty (i.e., census tracts where 30% or more of the population is living below the Federal Poverty Level)	American Community Survey IPUMS data	Annually

<i>(Measurable proxies to inform progress toward our goals)</i>	<b>LINKED GOALS</b>	<b>DEFINITION &amp; NOTES</b>	<b>DATA SOURCE</b>	<b>FREQUENCY</b>
q) % of families not likely to move out of SF within 3 years	F	Defined as % of families who respond "very likely" or "somewhat likely" to the question: "In the next three years, how likely are you to move out of San Francisco?"	Controller's City Survey	Every 2 years
r) % change in SFUSD enrollment and % actively participating in SFUSD enrollment process	F	Local data has indicated that perception of the quality of public schools and enrollment process impact families' decisions about moving out of the city.	SFUSD/CBEDS	Annually
s) % of parents who regularly access city libraries, parks, and Family Resource Centers*	F	Would be reported as two metrics: a) % of families who respond that they visit parks frequently (at least once a month) and % of families who used the library in any way in the past 12 months, and b) % of families participating in a city-funded Family Resource Center	Controller's City Survey; First 5 San Francisco	Every 2 years; Annually
