**Our Children,
Our Families Council**

Goal Working Group Design (DRAFT for discussion)

	Design #1: New Group formed within each Goal	Design #2: Build on an existing Group within each Goal
Participants	• A representative from each initiative within each goal attends the Goal Working Group.	• An existing initiative within each Goal is chosen to be the Goal Working Group (i.e. Child Abuse Council is chosen to be the Goal A Working Group) • Meetings are supplemented with outside support and additional representatives from other initiatives within that goal not represented on existing initiatives
Meetings and how they'll work	• This group meets six times during FY 2016-17 • Group meetings are facilitated to focus on the collective impact strategies. • Between meetings, representatives report back to their respective initiatives about work happening in the Goal Group as well as bringing information from their initiative to the Goal Group.	• This group meets six times during FY 2016-17 • Between meetings, representatives report back to their respective initiatives about work happening in the Goal Group as well as bringing information from their initiative to the Goal Group. • Between meetings, the existing initiative can continue with its service delivery focus.

DRAFT Scope and Sequence (applies to both designs)

Meeting #	Notes and guiding questions
1) Data dive	• Supported by the Data Working Group • Deep dive on the measures for this goal • Look at existing and planned data sources; discuss targets; and areas for greater focus.
2) Fiscal mapping	• Supported by OCOF staff • Look at how resources are spent as it relates to this goal and the measures
3) Service delivery	• Supported by Service Inventory Working Group • Review of services in this goal • Discuss ways to close gaps and reduce redundancies • Service inventory working group members bring a lens that spans across goals
4) Staff training	• What training exists and where could we collaborate? • Where are the gaps given the measures?
5) Shared accountability	• How can we hold ourselves accountable to deliver on these strategies and measures?
6) Data review and recommendations	• What are our key recommendations to the plan and progress report as it relates to our goal? • How have we done in making progress towards our measures and collective impact practices this year?

Discussion Questions:

• Which design resonates more with you? Or do you have an alternative or hybrid?

• What pieces do you want to keep? What would you add or delete?

• Other probing questions:

  o Is there a natural "mega" group working on your goal?
  o What would support look like to enact these strategies?
  o Who/what entity makes sense to facilitate these discussions?
  o Where is this work already happening within your goal?
