

BARROW GREEN GAS

ADDING VALUE TO AD BUSINESSES

THE UK'S PREMIER BIOMETHANE SHIPPER

Who Are We & What Do We Do?

Barrow Green Gas is the trading name of Barrow Shipping Limited (BSL). We hold a UK Gas Shipper Licence and create value for Biomethane producers through:

- Purchasing Biomethane .
- Offering a flexible service – no restriction on volumes .
- Optimising transportation discounts.
- Separating Green Gas Certificates (GGC) from gas production.
- Marketing GGC collectively to maximise their value.
- Membership of our Biomethane Producers Club .
- Retailing Biomethane.
- Offering sale of Biomethane without Climate Change Levy.
- Supply your sites and those of your Suppliers and Customers with Biomethane via the Natural Gas network. This is done at transparent and competitive prices.

Our Offer

A tailored shipper service to meet the specific needs of the biomethane sector:

Biomethane

- Buy your Biomethane at Transparent prices linked to the Published price of Natural Gas.
- Simple flat rate fee charging.
- Offering future benefit share as more Biomethane Producers sign up and BSL becomes a national Biomethane supplier.
- Tailoring data services to meet your needs.
- Simple gas sale and purchase agreements.

Green Gas Certificates

- Proof-of-origin Certificate title transfers to us and we market to create value.
- Aim to create value by aggregating Certificates from Biomethane projects.
- Transfer title back to Producer if preferred.
- Working closely with REAL not for profit Green Gas Certification scheme.

Transportation Discounts

- Shippers may receive discount for gas entering the system at lower pressure tier.
- Discounts negotiated with the gas networks and share offered of any Network discount achieved.

Benefits Share

- Our partnership approach means that we offer you a future share in additional benefits achieved through increased scale as more Biomethane producers join us.
- Upside sharing from gas supply arrangements.

Biomethane Producers Club (BPC)

- A partnership approach has recently been included to create the BPC, an active forum to share technical, operational and commercial information to optimise plant efficiency and financial return for Biomethane Producers, including:
 - RHI application support
 - NEA negotiation assistance
 - **Environmental Sustainability** support options
 - Regular review meetings
 - Group buying opportunities
 - Performance benchmarking of gas clean up and upgrading plant
 - Group servicing opportunities and sharing of spares
 - Group HSE collaboration
 - Joint specific research
 - Operator training

Our Track Record So Far

- Current gas-to-grid schemes committed to BGG and the BPC:

- J V Energen	- Beccles
- Vale Green x 2	- Isle of Wight
- Wyke Farms	- Mitchum
- Greener for Life x 2	- Widnes
- Yelspa Ltd	- Helmdon
- Chittering	- Five Fords
- Completed first sale of Green Gas Certificates in the UK following a pilot tender in April 2013.
- Delivered first Biomethane to customers in 2014.
