## Where Quality Matters

We are not the only fence company that believes in good work, but whoever you choose remember to do your research, get a fence that is worth your investment, and will be a fence that you and your family can enjoy for years to come!

### Top 10 Quality Questions

#### To Help You Avoid Future Repair's Or A Bad Investment.

**#1 Do you carry a contractors license as required by law to do work on my property?**

**#2 Will you dig my post 16"- 24" deep to prevent my fence from leaning over in the future?**

**#3 Is there a difference in the quality of material available for a longer lasting fence?**

**#4 Will you jackhammer if rock is found, to prevent my fence from leaning over in the future?**

**#5 Will you use ring shank galvanized nails or exterior screws to prevent backing out and or rust for my new fence?**

**#6 Do you have a workmanship warranty incase I have a problem with my fence in the near future?**

**#7 Do you carry License and Insurance to protect me incase of a injury or damage to my property?**

**#8 Will you use cedar 2x4s or metal framing on my gate to help prevent warping?**

**#9 Will you use 3 rails of 2x4s on my 6ft wood fence to help prevent warping and weathering?**

**#10 Does my fence have a manufactures warranty incase it fades or rust?**

A Contractors License is a process that is required by Law in most counties including Davidson County to check bank records, to make sure the proper insurance is in place, to check references and to make sure that the contractor understands and knows the law. All these things are required to help make sure you and your property will be protected from law suits from damage done to property persons or of employees of the employer.

**Just because someone has a nice business card and website doesn't mean you are protected. To find out more about what is required in your county, to check a company or to find out more information contact the TN State Board of Licensed contractors at 1-800-544-7693 or find them on the web at <http://tn.gov/regboards/contractors/>**

## Build a Fence and Change a Life

Every fence we build a % goes to the Rescue One Foundation to help bring compassion and hope to young girls trapped in desperate situations due to sex slavery. At K & C we believe in giving back into our communities and the world around us, to live for a purpose and to lend a hand to ones in need.

Join Us! Even if you decide to purchase fencing from another company you may contact us at anytime for more information on how you can help or to learn more about this growing sad epidemic.

**K & C carries a TN State Contractors License,  
Workman comp & GL Insurance for your protection**

## What to expect when having a fence installed - Nashville TN

### **#1 Your Estimator Can Be Working With Numerous Customer At One Time.**

Your estimator is running estimates back to back and gets a lot of phone calls, therefore we do not make a lot of phone calls out. Often calls and emails are not returned until the evening or the following day. If you have a concern, have picked a specific install day, have any question at all please feel free to contact your estimator anytime. If you need a more immediate response feel free to contact our customer service personnel at [junlyn@fencenashville.net](mailto:junlyn@fencenashville.net)

### **#2 Wood Is Subject To Warp, Twist, Crack and or Rot.**

We work hard at the small install details to help minimize the natural movement that takes place in Natural Product such as Wood. But no mater where you purchase or who installs wood will always do some moving and can cause problems around gates and the fence itself. We do have metal frames available to help around gates and maintenance free products if this concerns you.

### **#3 We Must Walk Back And Forth On Your Property.**

When Walking back and forth to perform the fence installation you can have some normal wear on your grass and property, and it may take some time for your property to recuperate.

### **#4 You Will Have Left Over Dirt On Your Property.**

There will be left over dirt on your property, we will try to spread the dirt as much as possible but depending on the dirt condition the dirt may not spread evenly. You may have some additional ground work to do once your fence has been installed.

### **#5 We Do Not Remove Rock From The Property.**

Tennessee dumps do not take rock and we have no where to put rock. If you have no way to remove rock and are concerned about a lot of rock that you can not handle, please contact your estimator to ask about the fees associated with rock removal.

### **#6 Make Sure The Details On Your Contract Are Correct.**

Always read your contract to make sure it has all the information you have asked for and that the correct fence and fence details are listed. It is your responsibility to approve the contract before signing.

### **#7 We are Always Trying To Get To Your Job As Soon As Possible.**

When scheduling you will get a general estimated time frame because weather, rock and or mud can cause delays. As we get closer to your job our estimated day gets better and a day or 2 before we will call and tell you exactly when.

### **#8 You May Have Gaps Under Your Fence Depending On The Grade Of The Ground.**

Depending on your ground condition you may have gaps under the fence that will require for you to fill them in. We do not make trips back to grade your yard level. Our goal is to work hard on making your fence look good which can sometimes mean keeping the top straight when your ground is not.

### **#9 Any Underground Private Utilities Are The Property owners Responsibility.**

We install your fence where you tell us to and have no way to detect private underground utilities and are subject to break them. It is the property owners responsibility to let us know where these line are.

### **#10 Double Check The Fence Location.**

We like to do what a wood carpenter calls measuring twice and cutting once. We will want you to be there to approve the fence location one more time the day of install either with the fence installers or with the estimator. If you can not be there please make sure the corners are marked and double check them before we come.

### **#11 Do A Sign Off Sheet With Us When We Are Finished.**

Help us keep our prices competitive by walking the job with us when we are done to approve the work and address any concerns you may have. It helps us keep our prices competitive when we do not have to make trips back
