Ali G. Hamedani, MD MHS is an Instructor of Neurology at the Perelman School of Medicine at the University of Pennsylvania. He obtained his M.D. from the University of Maryland School of Medicine in 2013 and also holds a master’s degree in epidemiology from the Johns Hopkins Bloomberg School of Public Health. After completing his neurology residency at the University of Pennsylvania in 2017, Dr. Hamedani obtained fellowship training in both neuro-ophthalmology and movement disorders. His overarching research interest is the relationship between visual function, outcomes, and quality of life in PD and other neurodegenerative disorders. For his 2019 PSG Mentored Clinical Research Award, Dr. Hamedani will be working with Allison Willis, MD MSCI to use Medicare-linked data from the National Health and Aging Trends Study (NHATS) and Health and Retirement Study (HRS) to examine the prevalence of oculovisual symptoms and their associated diagnoses and healthcare utilization patterns among Medicare beneficiaries with prodromal and symptomatic PD. He will also use data from the Fox Insight online survey platform to develop a PD-specific vision-related quality of life instrument.
