**RE: The Importance of Including Payments in Lieu of Taxes for EM in the DOE
FY 2023 Budget**

Dear Secretary Granholm,

On behalf of the School Boards for North Franklin, Paterson, Prosser, Richland, and other rural school districts in Benton, Franklin, and Grant counties in Washington state, the undersigned are writing to request the Department of Energy (“DOE”) include Payments in Lieu of Taxes (“PILT”) payments in the FY 2023 DOE budget request for Environmental Management (“EM”). PILT payments support our schools. It is critical to our communities that DOE ensures the continuation of PILT in future budget requests. We believe this request is consistent with the President’s Environmental Justice commitment.

Last year, the President’s budget did not support PILT funding for our communities adjacent to the EM-led Hanford Site. Luckily, the House and Senate overwhelmingly supported our communities. We appreciate that DOE supports this initiative but understand that the Office of Management and Budget may have cut the funding for one of the sites impacted by the largest environmental cleanup projects in the country.

Not including EM PILT funds in this year’s budget will cut essential funding for our communities at a critical time. PILT payments support our vital local government functions and are used to provide municipal services at the Hanford Site at levels, and in quantities, that otherwise far outstrip some of our communities’ tax bases. Even so, PILT payments are equal to only a fraction of what private companies and employees would contribute to local tax revenues for similar land, improvements, and service usage. Without PILT payments, our communities would lack the ability to educate children – including the children of the people that undertake the critical environmental cleanup at the Hanford Site – provide emergency services, replace aging infrastructure, and attract investments needed to sustain legacy environmental cleanup at the site.

As the host communities of one of our national security and defense missions, we ask for your assistance and support in ensuring that future DOE budget requests, including for FY 2023, include sufficient funding for PILT payments to our communities and to all DOE-impacted communities currently eligible for receipt. We also ask that DOE continue to advocate for the inclusion of PILT payments to the Office of Management and Budget.

We believe the Administration readily supports the funding necessary for DOE to disperse PILT payments to the communities wherein they operate. At your request, we would be happy to

provide additional information on the necessary functions that PILT payments serve in our local communities.

Sincerely,

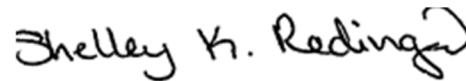

Jim Jacobs
Superintendent
North Franklin School District

**RE: The Importance of Including Payments in Lieu of Taxes for EM in the DOE
FY 2023 Budget**

Dear Secretary Granholm,

On behalf of the local governments in communities adjacent to the Hanford Site, I am writing to request the Department of Energy (“DOE”) include Payments in Lieu of Taxes (“PILT”) payments in the FY 2023 DOE budget request for Environmental Management (“EM”). PILT payments support local school, police, and emergency response funding to our frontline communities adjacent to the DOE site. It is critical to our communities that DOE ensures the continuation of PILT in future budget requests.

Last year, the President’s budget did not support PILT funding for the communities adjacent to the EM-led Hanford Site, but did support PILT funding for National Nuclear Security Administration, Office of Science, and Office of Nuclear Energy managed sites. Luckily, the House and Senate overwhelmingly supported the Hanford Site communities. We hope that everyone in the budget process understands the importance of PILT to our communities, as well as to our colleagues at the Savannah River Site who also did not initially receive funding.

Not including EM PILT funds in this year’s budget will cut essential funding for communities as small as 8,000 people at a critical time. The PILT payments support vital local government functions and are used by our communities to provide municipal services at levels, and in quantities, that otherwise far outstrip our communities’ tax base. Even so, PILT payments are equal to only a fraction of what private companies and employees would contribute to local tax revenues for similar land, improvements, and service usage. Without PILT payments, our communities lack the ability to educate children (including the children of the people that undertake the critical environmental cleanup at DOE sites), provide emergency services, replace aging infrastructure, and attract investments needed to sustain legacy environmental cleanup at the DOE site.

As the host communities of one of our national security and defense missions, we ask for your assistance and support in ensuring that future DOE budget requests, including for FY 2023, include sufficient funding for PILT payments to our communities and to all DOE-impacted communities currently eligible for receipt.

We believe the Administration readily supports the funding necessary for DOE to disperse PILT payments to the communities wherein they operate. At your request, we would be happy to provide additional information on the necessary functions that PILT payments serve in our local communities.

Sincerely,
