

## SCAPCNS LUNCH BUNCH

### Reminders:

- ☀ Lunch Bunch begins on Monday, **September 11th**.
- ☀ Please send a lunch to school with your child. Milk and water will be provided.
- ☀ If you plan to drop in, please notify Genny Hagler ([genny@scapc.org](mailto:genny@scapc.org)) at least 24 hours in advance.
- ☀ Please send a written note if someone other than the usual person is picking up your child. Carpool will take place at the Benjamin Street gate. Pick up begins at 2:15 and ends at 2:30. ***Please note: A late fee of \$3.00/min. will be charged after 2:30 pm.***
- ☀ We will send invoices home in late September after we have received your registration.

Thank you!

Genny Hagler, [genny@scapc.org](mailto:genny@scapc.org)

# SCAPCNS LUNCH BUNCH

Lunch Bunch this Fall is open to all potty-trained children in the upstairs classrooms from 11:45 to 2:30 PM (M-Thurs.) at a cost of \$20/day. The drop in rate is \$25/day (M-Thurs.).

Each day your child will enjoy indoor and outdoor activities focusing on developing fine and gross motor skills, listening skills, creativity, teamwork, and a love of books and stories. Your child may attend any combination of days. Lunch Bunch will be registered by semester on a first come, first served basis. On Mondays, we will serve a pizza lunch.

## **Monday: Yoga ( + PIZZA LUNCH)**

Children will strengthen their sensory and motor skills while increasing flexibility, coordination, and building body awareness. They will learn how to focus through breathing and relaxation techniques. This fun, energy releasing class will use simple poses that encourage children to “bark like a dog, hiss like a cobra, and flutter like a butterfly.”

## **Tuesday: Art & Literacy**

Children’s development as readers and writers occurs as they engage in a variety of literacy experiences and interactions. They will use art, stories, and storytelling as a way to understand colors, shapes, letters, nature, food, and feelings (just to name a few). Children will use their creativity to make amazing masterpieces.

## **Wednesday: Cooking & Math**

Children will expand their taste buds and have lots of fun in the cooking and creating process. They will learn about measurement, estimation, and following directions.

## **Thursday: Let’s Build**

Children will build, create, and make (but sometimes demolishing and dissecting can be just as fun). Children will learn that tools and simple machines make work easier (and can be used in a variety of ways), that they can measure using objects as units, and that architecture is made up of shapes.
