The making of friends with Islamicists

Brabha Chellany says terrorism can't be stopped if West supports extremist regimes

Fighting the decays of "Mussolinism, Hitlerism, Lubyanka in the United States, terrorism", the US government announced the "abolition" of the country. But it did not enact formal public affiliations with political parties or religious groups. The United States has no such problem. But it doesn't mean that the Chinese authorities are complacent. In fact, the Chinese government has been doing more to fight terrorism than most other countries.

During the colonial era, and even after the 1980s, the pro-communist leadership in Hong Kong has been aware of the need to counteract the influence of Chinese culture. Nevertheless, some scholars argue that the Chinese authorities have been too lenient in their approach to fighting terrorism. The Chinese government has been accused of using excessive force and violating human rights.

For many years, the Chinese government has been trying to strengthen the influence of Chinese culture in Hong Kong. Despite some setbacks, the Chinese government has been successful in strengthening its influence over Hong Kong. It has been able to limit the influence of western culture and promote Chinese culture.

But this has not been without its problems. The Chinese government has been accused of using excessive force and violating human rights. Some scholars argue that the Chinese government has been too lenient in its approach to fighting terrorism.
