Beijing must deal more flexibly with Africa

Amit Bhillon cringes at its attempt to push its economic interests to oust its rival China

India should stick to business in Africa

Anthony Ricciulli writes: To avoid overt confrontation with China, the Indian government should stick to a business-like approach to economic interests in Africa.

Closing ranks

Greg Torode explores the informal but growing strategic alliances that are coming together as China deals with its rising influence

Anne-Marie Jackson introduces her Guide to the Grouping of Asian Powers: China. A few Asian powers and one European country have been chosen for the focus of this introductory chapter. They are: China, Japan, India, Indonesia, and South Korea. By the end of the book, the authors will offer a rationale for why these countries have been selected. This chapter explores the various factors that led to this choice. As the authors will explain, the book will eventually consider whether their choice has been justified.

As the authors begin to introduce the group of Asian powers, China is the first country to be considered. The book will introduce the group of Asian powers by looking at China’s economic, political, and security interests in the region.
