

Principles:

1. People don't travel faster than the speed of light, their worldlines are "timelike"
2. Bran "Wargs" with other organisms by sending "warg signal" which moves at or slower than the speed of light.
3. The Weirwood trees allow communication signals, travelling slower than speed of light to travel "backwards" along their extended worldlines.
4. Bran interacts with Hodor at a time prior to his birth.
5. Hodor interacts with Bran after his birth.
6. There are closed causal loops.
