The University of Toronto Anti-Black Racism Task Force, which was established in 2020, has delivered its final report. In its response, the University administration accepted all 56 of the task force’s recommendations.

THE RICHARD K. REZNICK

WILSON CENTRE VIRTUAL RESEARCH MONTH 2021 - October 4 to 22
https://thewilsoncentre.ca/events-1

Program & Registration:

The Richard K. Reznick Wilson Centre Research annual event was established to celebrate the remarkable depth and breadth of scholarship in health professions education underway at the University of Toronto and the University Health Network. Whether in person or virtual, we will continue to highlight our community’s successes and accomplishments.

Celebrating 25 Years of Excellence in Health Professions Education Research
This year we are very excited to offer a month-long virtual celebration of the Wilson Centre’s 25th Anniversary as part of the Richard K. Reznick Wilson Centre Research events. These events will include fireside chats, keynote panels and virtual podium and 3x3 sessions.

Fireside Chats
Please join us for five special Fireside chats featuring special guests as they discuss the thorniest challenges, the most interesting tensions, and the state of the sciences that inform health professions education. Each Fireside chat features a current or former Karolinska Prize https://ki.se/en/about/karolinska-institutet-prize-for-research-in-medical-education winner and recent alumni of the Wilson Centre engaging in conversation around the intersections of their ideas and work. Moderated by Wilson Centre Scientists, the conversations promise to be thought-provoking and challenging takes on the big questions of health professions education research. Audience members will have a chance to engage and pose questions with the speakers.”

Registration is required in order to get the link from conference venue to join:
LIVE FIRESIDE CHATS

All from 12:00-1:00 pm

Karolinska prize-winning Scientists and Alumni
About the presenters
https://events.myconferencesuite.com/Richard_Reznick_Wilson_Virtual_Research/page/Presenters

Monday, October 4
Drs. Glenn Regehr & Alaa Youssef with moderator Dr. Maria Mylopoulos
Crossing Borders Collaboration Beyond the Wilson Centre

Wednesday, October 6
Drs. Lorelei Lingard & Rene Wong with moderator Dr. Ayelet Kuper
Insider? Outsider? Reflections on the interstitial space of HPE scholarship

Tuesday, October 12
Drs. Richard Reznick & Jamie Kellar with moderator Dr. Tina Martimianakis
Who are we and where are we going? Shifting Visions for Health Professions Education Practice

Wednesday, October 13
Drs. Geoff Norman & Jeffrey Cheung with moderator Dr. Mahan Kulasegaram
Killing the Sacred Cow? Questioning Authenticity as a Mechanism of Learning

Tuesday, October 19
Drs. Brian D. Hodges, Cristian Rangel with moderator Dr. Paula Rowland
Pandemic as a Portal: Reflecting on Relationships between Thinking and Doing

PREAMBLE: Inspired by the imagery of Arundhati Roy in “The pandemic is a portal”, Drs Hodges and Rangel will reflect on dynamics of advocacy and activism within health professions education and health professions education research. If the pandemic is a portal between two worlds, what ideas about evidence, science, theory and advocacy do we need to carry over the thresholds? What should we leave behind? And … are ideas enough? These reflections begin with questions of advocacy and activism, but ultimately invite conversation on the roles of education research communities in complex and changing worlds.

3x3 Presentations
The affordances and limitations of the virtual format is something we are continuing to experiment on. This year, instead of a ‘poster’ session, we are creating the 3x3 session. This innovative format requires individuals to present their work in our virtual sessions using only 3 slides for a total of 3 minutes. This will be followed by a brief Q&A for 2-minutes. 3x3 will be judged for the best presentation award.

Wilson Centre Research Rounds
Monday, October 25, 2021 -- 12:00 – 1:00 pm
https://us02web.zoom.us/j/88637105273?pwd=M2FFQXpXNUJqUHZvQkp5WVd2MEJGQT09

A note about webcams: We understand that sometimes bandwidth issues or other technical problems may interfere, but recommend that, if possible, the audience keep their webcams on throughout the rounds.

PRESENTATION 1: 12:00-12:30
The Other Birth Stories: Power and Emotion in Perinatal Clinician Narratives
Laura Brereton, Wilson Centre PhD student

This is an ongoing piece of work stemming from the literature review behind my doctoral project. I am using critical thematic analysis to explore 'unauthorized' discourses of emotion in clinicians’ written accounts of providing and receiving perinatal care.

PRESENTATION 2: 12:30-1:00
International is this: a bibliometric analysis of authorship distribution in top medical education journals
Presenters: Carrie Cartmill1 and Cynthia Whitehead1,2,3
Research team members: Manuel Costa,4 Eloy Rodrigues,5 Antonia Correia,5 Dawit Wondimagegn,6 Tiago Salessie7

1 The Wilson Centre, Temerty Faculty of Medicine, University of Toronto & University Health Network, Canada
2 Department of Family & Community Medicine, University of Toronto, Canada
3 Women’s College Hospital, Canada
4 Student Affairs and Pedagogical Innovation, Universidade do Minho, Portugal
5 Unidade de Serviços de Documentação e Bibliotecas, Universidade do Minho, Portugal
6 College of Health Sciences, Addis Ababa University, Ethiopia
7 Departamento de Promoção da Saúde, Universidade Federal da Paraíba, Brazil

Conversations about the ethics of academic publication in medical education emphasize the role of individual scholars in determining who qualifies and is eligible for claiming authorship. Journal editorial policies similarly ascribe to guidelines that ensure that individuals are appropriately recognized for their contributions to published scholarship. These guidelines may not, however, reflect the contributions of collaborators with diverse voices and perspectives. Scholars from low- and middle-income countries, and those for whom English is not a first language, may be silenced and underrepresented within journal publications. This is a particular problem for a field that intends to be international in scope, since published articles may only represent the perspectives of those with the resources to have their voices included. We were invited by collaborators in Portugal to contribute to a bibliometric analysis of the country of origin of authors publishing in the top five medical education journals between 2012 and 2018. Results from this analysis showed that 73% of first and last authors publishing in the top five medical education journals were from only five countries: USA, Canada, UK, Netherlands, and Australia. Approximately half of the world’s countries did not have a single first or last authored paper published in these international journals. As we engaged with our international colleagues on this work, we became acutely aware of how our own collaborative process was itself a case study of the phenomenon we were examining. While we were attentive to this, it did not solve authorship dilemmas, but rather highlighted inequitable access to time and resources to allow completion of the research. As collaborators from one of the privileged five countries, we must decide whether we are making valuable contributions to ensuring that this work gets published or are rather engaging in a form of academic colonization.

*******************************************************************
MAXIMIZING THE RIGOUR AND EFFECTIVENESS OF COLLABORATIVE EDUCATION RESEARCH

Upcoming Dates: TBA **Please note: We have postponed our Fall offering due to COVID.

PROGRAM GOALS
- Reinforcing evidence based & ethical practices in education research;
- Creating an effective interdisciplinary collaborative research team;
- Appreciating the research skills & lens you bring to a research team.

Sessions will focus on common methodologies and contemporary topics in health professions education research, delivered by researchers from across professions and disciplinary backgrounds. Participants will receive a certificate of completion.

COST & REGISTRATION:
$2,400.00 (Atelier with 2 workshops in Week 2)
$2,700.00 (Atelier with 3 workshops in Week 2)

NOTHING LESS THAN GREAT
By Harvey P. Weingarten
Book Launch & Panel Discussion
Friday, October 15, 2021
11:45 am-1:00 pm
What is the current state of Canada’s universities? Does public higher education have a bright future? Can operational and public policy changes improve the quality of our post-secondary school system? To celebrate the release of Nothing Less than Great: Reforming Canada's Universities, author Harvey P. Weingarten will explore these timely issues with several leading voices on higher education in this country: Simona Chiose, Indira V. Samarasekera, and Hugh Segal. The webinar will be moderated by John Fraser. A Q&A will follow the panel discussion.

University of Toronto Press (UTP) proudly presents this book launch for Nothing Less than Great in partnership with The Institute for Education Research (TIER), The Wilson Centre, and The Michener Institute at the University Health Network (UHN).

About the Book

NOTHING LESS THAN GREAT provides an expert analysis of the current state and challenges of Canada’s university system, looking for positive change by reclaiming what a university is meant to offer for society and for citizens. Harvey P. Weingarten begins with the fundamental question that all students must ask about higher education: Is it worth going to university? Weingarten stresses the need for transparency, addresses the importance of skills training, and provides recommendations for reform. Exploring how universities might – and should – change to reclaim their central purpose for Canadians, Nothing Less than Great will be of interest to anyone who cares about the role universities play in shaping the future of this country.

Meet the Panelists

HARVEY P. WEINGARTEN is the first Principal of the School of Applied Health Sciences in The Michener Institute of Education at University Health Network. He was formerly Vice-President (Academic) and Provost at McMaster University, President of University of Calgary, and most recently, President and CEO of the Higher Education Quality Council of Ontario. Harvey is a Senior Fellow at the C.D. Howe Institute. He is also a Senior Fellow at Massey College. His most recent book is Nothing Less than Great: Reforming Canada’s Universities.

SIMONA CHIOSE is a feature and investigative journalist and public policy analyst who has covered higher education, immigration, film, and music for two decades for a variety of journalism outlets. She is currently researching how labour markets define global employee talent and the recruitment strategies used by firms to find highly skilled workers abroad. She has a PhD from the University of Toronto in political science where her dissertation compared pathways to entry in Canada and Britain for workers and refugees. After many years as a writer and feature editor at The Globe and Mail, she now works as an analyst in government relations at U of T.

JOHN FRASER is a Canadian journalist, writer, and academic. He is founding president and CEO of the National NewsMedia Council, the principal media ethics watchdog in Canada. John currently serves as the Council’s executive chair. He served as Master of Massey College from 1995–2014, and taught a course on the history of newspapers at the University of Toronto. He’s played several prominent roles – national columnist, foreign correspondent, and Ottawa bureau chief – at The Globe and Mail, and his work has been honoured with multiple national journalism awards. In 2020 John received the prestigious Michener-Baxter Special Award from the Michener Awards Foundation for long-term achievement in public service journalism.

INDIRA V. SAMARASEKERA is a senior advisor at Bennett Jones LLP, a law firm, and a corporate director. Internationally recognized as one of Canada's leading metallurgical engineers, she advises clients on mining, oil and gas, and environmental matters. A former president and vice-chancellor of the University of Alberta (2005–2015), Indira is the recipient of multiple honorary degrees. She was the Vice President, Research at the University of British Columbia, (2000–2005). Indira is an Officer of the Order of Canada and a Foreign Associate of the National Academy of Engineering. She is a Distinguished Fellow in Residence at the Liu Institute for Global Issues at the University of British Columbia.

HUGH SEGAL is a Senior Strategic Advisor at the Aird & Berlis LLP law firm, and a Distinguished Fellow at both the Munk School of Global Affairs and the School of Policy Studies at Queen's University. The fifth Head of Massey College at the University of Toronto, where he is a Senior Fellow, Hugh is a former Chair of the Senate Foreign Affairs Committee and the Special Senate Committee on anti-terrorism. He has also served as Chief of Staff to Prime Minister Mulroney, Associate Cabinet Secretary for federal provincial relations in Ontario under Premier William Davis, and as President of the Institute for Research on Public Policy in Montreal.

Registration: https://us06web.zoom.us/webinar/register/WN_XocHkbuYRqiN_NaA9ftRXQ
All ECHO sessions consist of a didactic lecture by a content expert & patient case discussion (presented by participants).

**About our Programs:**
- Open to all health care providers
- No cost to join (*Echo Ontario is funded by the Ontario Ministry of Health*)
- Online (via zoom)
- Earn CPD credits
- Present your cases for support from the ECHO Interprofessional Specialist team

UofT’s collaboration with Addis Ababa Univ is transforming health care in Ethiopia
On average, 80 faculty from across UofT travel to Ethiopia every year as volunteers to provide academic training, teaching, support, research collaboration, clinical supervision and mentorship in 21 different programs. “The program works because of decent people on both sides who care about health equity and education,” says Dr. Clare Pain, co-director.

AFMC creates new event for networking, learning and sharing
AFMC is pleased to announce that it will be hosting the inaugural International Congress on Academic Medicine (ICAM) in Quebec City, Canada April 12-18, 2023 for both in-person and virtual options. This annual event unites educators and education scholars along the continuum of medical education including undergraduate, postgraduate, continuing medical and health professions education as well as graduate studies. ICAM is Canada’s first transdisciplinary gathering in academic medicine. The Congress will include colleagues who are health researchers and health research education leaders. This will enhance our engagement, discussions and synergies on common themes and issues in academic medicine. ICAM will be a venue to promote innovation and scholarship in medical education and health research on an international scale. Delegates will convene with Canadian and international colleagues to network and develop new relationships and collaborations. ICAM will include a special focus on all academic medicine learners including medical students, residents as well as graduate students. Learners will have the opportunity to present, network and to connect with medical education and research mentors. A special feature of the event will be a career fair for learners across the continuum.
Want to stay informed about ICAM - https://www.afmc.ca/web/en/faculties/icam

The Future of the Professions in the Age of COVID-19

Professor Daniel Susskind

Thursday, October 7, 2021

12:00 PM – 1:00 PM EDT

REGISTER:

About this event: In this talk, Dr. Daniel Susskind will explore the future of the professions in the age of COVID-19. Drawing on his best-selling books, The Future of the Professions (2015; 2017) and A World Without Work (2020; 2021), he will set out two futures for the professions. Both rest on technology. One is reassuringly familiar. It is a more efficient version of what we have today. The other is transformational -- a gradual replacement of professionals by
increasingly capable systems. In an Internet society, the professions will look remarkably different from today, and we will neither need nor want doctors -- or lawyers, teachers, architects, the clergy, consultants, and many others -- to work as they did in the 20th century.

Dr. Daniel Susskind is a Fellow in Economics at Oxford University, and a Visiting Professor at King’s College London. He is the co-author of the best-selling book, The Future of the Professions (2015) and the author of A World Without Work (2020), described by The New York Times as "required reading for any potential presidential candidate thinking about the economy of the future". His TED Talk, on the future of work, has been viewed more than 1.6 million times.

Previously he worked in various roles in the British Government – in the Prime Minister’s Strategy Unit, in the Policy Unit in 10 Downing Street, and in the Cabinet Office. He was a Kennedy Scholar at Harvard University.

Artificial Intelligence in Healthcare Education Journal Club
https://www.uhn.ca/Research/Research_Institutes/The_Institute_for_Education_Research/Events/Pages/AI_Journal_Club.aspx
AI in Healthcare has the potential to transform care delivery, teaching, and learning across all health care professions. Today, the hype for AI has far exceeded the science on AI implementation and education. Join us at this journal club to learn more about the advances and challenges to safely deploy AI in health care.

Indigenous Resources from the LRC – Michener Institute
As part of Michener's commitment to Truth and Reconciliation, the Learning Resource Centre (LRC) has curated a guide to Indigenous resources for the Michener community. Many of the resources come from University of Alberta, University of Winnipeg and University of Toronto, and include research and study guides and community resource web links.
Click here to access the Indigenous LRC resources. jrichardson@michener.ca

New Online System for Managing UoT Non-funded Agreements (Data Transfer, MOUs...)
If you require an institutional signature on any non-funded research agreements such as a Memorandum of Understanding, Data Transfer Agreement, and others - this message is important to you.
On July 29, 2019, the University of Toronto is expanding the MRA system to include a new online submission process for managing non-funded research agreements called the My Research Non-Funded
Agreements (MRNF). This system will handle all agreements related to: material transfer, confidential disclosure, data transfer, memorandum of understandings, collaboration agreements etc. This will facilitate the approval and submission process, and allow researchers to easily access their non-funded agreements. We have attached a one-page information sheet which describes the types of agreements that will now be managed by MRNF. For those agreements which you used to email to innovations.partnerships@utoronto.ca to obtain an institutional signature, you will now login to the MR web portal, click on Applications and Agreements and then Non-Funded Applications to submit your agreement. If you have access to the MRA system, then you will automatically have access to the new MRNF. Questions? research.dlsph@utoronto.ca

Book co-authored by Dr. Brian Hodges released in November 2020
Available McGill Queen’s University Press and also available on Amazon.
With many concerned that an increase in technology could mean the disintegration of compassionate care, a team from Associated Medical Services (AMS) that includes UHN VP of Education Dr. Brian Hodges has written a book called Without Compassion, There Is No Healthcare that will be published this November. The topic was born out of the AMS Phoenix Project, which is focused on making a positive and lasting difference in how health professionals develop and sustain their abilities to provide humane, compassionate, person-centred care. The project aims to instill and sustain compassion, empathy and professional values in the environments in which health professionals learn and work.
The book is written by three AMS leaders: Dr. Brian Hodges, Founder of the AMS Phoenix Project and Chief Medical Officer at University Health Network (UHN), Gail Paech, CEO of AMS, and Jocelyn Bennett who leads the Phoenix Program. https://michener.ca/book-co-authored-by-dr-brian-hodges-to-be-released-in-november/

AI for Clinician Champions Certificate Program
The School of Continuing Education at Michener and the Vector institute are so excited to announce the launch of our new AI for Clinician Champions Program as part of the Accelerating the Adoption of AI in Healthcare grant project. This is a six week virtual program starting November 4th, 2021, that will provide clinicians within Canada a working knowledge of AI and foundational skills for implementing AI in practice. Applications are now open for the pilot and will close on October 7, 2021. To learn more about the program and the overall project, please visit the course information page.
APPLY: https://michener.ca/ce_course/ai-for-clinician-champions-certificate-program/

Virtual Celebration of Education Scholarship event, presented by the Office of Education Scholarship.
The Theme: Productive Failure: Lessons for Lifelong Learning, Nov 22-23, 2021
A full program and registration information will be announced soon via the DFCM listserv.
Fireside Chat - Mon, November 22 (6:00-7:00 pm)
Dr. Danielle Martin, Incoming Chair, Department of Family and Community Medicine, University of Toronto
We are delighted that our new Chair, Dr. Danielle Martin, will be joining us for an informal chat on the evening of Nov 22. This will be a wonderful opportunity to get to know her, and to hear her thoughts on productive failure.
Morning Program - Tue, Nov 23 (9:00-12:00 pm)
Keynote Speaker: Prof. Dr. Manu Kapur, Chair of Learning Sciences & Higher Education, ETH Zurich
Title: Learning from Productive Failure
Dr. Kapur is an internationally recognized leader in the area of productive failure. His presentation promises to bring an engaging and challenging perspective to this important topic. There will be opportunity for questions and discussion, and we also look forward to hearing from some of our DFCM colleagues on their own learning experiences with failure.
Further information: dfcm.edscholarship@utoronto.ca
Dr. Danielle Martin is the incoming Chair of the Department of Family and Community Medicine (DFCM), University of Toronto. DFCM is the largest academic department of family medicine in the world and home to the World Health Organization (WHO) Collaborating Centre on Family Medicine and Primary Care.
Dr. Martin is grounded in her clinical primary care expertise. She is an active family physician whose clinical work has ranged from comprehensive family medicine in rural and remote communities to maternity care. She is a dedicated educator, mentor and role model to learners aspiring to enter medicine and health care leadership.

Dr. Martin is a respected leader in Canadian medicine and well-recognized media spokesperson, regularly named on lists such as Medical Post's Power List. Her 2014 presentation to a United States Senate Subcommittee about the Canadian health care system has been viewed by over 30 million people across the globe.

Dr. Martin spent eight years as a senior hospital executive, most recently as Executive Vice President and Lead Medical Executive at Women’s College Hospital (WCH), where she was also medical lead of the hospital’s COVID-19 pandemic response. At WCH, she led the establishment of Women’s Virtual, Canada’s first virtual hospital.

The recipient of many awards and accolades, in 2019 Dr. Martin became the youngest physician ever to receive the F.N.G. Starr Award, the highest honour available to Canadian Medical Association members.

**Prof. Dr. Manu Kapur** holds the Professorship for Learning Sciences and Higher Education at ETH Zurich, Switzerland, and directs The Future Learning Initiative (FLI) at ETH Zurich. An ETH+ funded initiative, the FLI brings together more than 20 professors from 10 departments at ETH to advance research on the science of teaching and learning in higher education contexts, and translate it into the practice of teaching and learning at ETH Zurich.

Prior to this, Manu was a Professor of Psychological Studies at the Education University of Hong Kong. Manu also worked at the National Institute of Education (NIE/NTU) of Singapore as the Head of the Curriculum, Teaching and Learning Department, as well as the Head of the Learning Sciences Lab (LSL).

A mechanical engineer by bachelors training, Manu has always been passionate about mathematics. He taught college mathematics for four years, during which he was also the deputy leader for Singapore’s team to the 43rd International Mathematical Olympiad in Glasgow. It was then that his intrigue for mathematical cognition took root, which led him to pursue a doctoral degree in the science of learning (specialization in instructional technology) at Columbia University in New York. Manu holds a double Masters: a Master of Science in Applied Statistics from Columbia University in New York, and a Master of Education from the NIE, Singapore.

As a learning scientist, Manu makes a commitment not only to advancing understanding of human learning, but doing so in ways that make an impact in the actual ecologies of learning. Drawing on his engineering mindset for design, Manu conceptualized and developed the theory of Productive Failure to design for and bootstrap failure for learning mathematics better. He has done extensive work in real-field ecologies of STEM classrooms to transform teaching and learning using his theory of productive failure across a range of schools and universities in around the world.

His research on Productive Failure has been taken up by the Singapore’s Ministry of Education for wide-scale re-design and implementation of its pre-university mathematics (statistics) curriculum and pedagogy. This demonstrated Manu’s ability to build and sustain a high-quality, interdisciplinary scientific research program and work with multiple stakeholders (politicians, policy makers, funding bodies, schools) to impact not only theory but also policy and practice at the national scale.

**A new way to conference: the ReThink Conference**

**ReThinking Clinical Reasoning Conference**
