ENGAGE INSTAFUEL

POWERED BY COLLAGEN

MUSCLES + JOINTS + ENERGY

ENGAGE INSTAFUEL works as a meal supplement for weight loss as well as protein-energy malnutrition.

ENGAGE INSTAFUEL provides 15g of liquid protein which differs greatly from other proteins in that it contains the amino acids: Glycine, Proline and Hydroxyproline in a concentration that is approximately 10-20 times higher than that of any other leading proteins in the market.

ENGAGE INSTAFUEL uses a proprietary blend of amino acids and pure collagen which is more efficiently absorbed into the blood stream compared to other forms of protein.

ENGAGE INSTAFUEL liquid collagen can be an effective method to support weight loss, strong bones and connective tissues as well as improvements in skin, hair and nail appearance.
