Beyond Trails

TUESDAY, MARCH 19

CONCURRENT SESSION A: 9:00 - 10:15 am

Planning and Development of Sustainable Urban Bike Parks

Tim Babcock, Bike Park Development Manager, Progressive Bike Ramps, PTBA Member

The "INs and OUT's" of Urban Bike Park Development. This interactive Q& A session will engage some of the world's best bike park developers. Topics will include: What is an Urban Bike Park, the planning process, structuring bids and RFP's to ensure qualified responses, sustainable design/build methods, Urban Bike Park maintenance, overcoming common objections to Urban Bike Parks through education, the return on investment (ROI) and the broad range of users in Urban Bike Parks, and making Urban Bike Parks a staple in our communities.

Lesson Learned from Designing and Constructing the High Rockies Trail

Matt Hadley, McElhanney Consulting Services Ltd.

We will present a case study of constructing High Rockies Trail, an 80Km shared use trail. The session will highlight the design process and learnings from all stages. Points of discussion will be how to maximize layout efficiency using apps and LiDAR along with ground truthing. The tendering package and process to ensure a quality trail builder is hired and ways to reduce construction management time.

PTBA Brings Great Trails to Life!

By the Numbers:

- 95 PTBA Members Nationwide
- Founded in 1976
- 50% of this Conference's sessions and workshops are led by PTBA members

Find a member near you: trailbuilders.org

TUESDAY, MARCH 19

CONCURRENT SESSION B: 10:45 am -12:00 pm

GIS for trails

Emilie Young Vigneault, Analyst, Sentiers Boréals, PTBA Member

GIS is a great underused tool in trail building. It can be used as a layout tool for future development projects or as a mapping tool for user and risk management teams. Participants will learn the strength and limitations of various GIS software and its uses for trails building, planning and management.

Connecting Communities: Integrating Transportation & Recreation Networks

Cindra Thompson, Federal Highway Administration (FHWA)

FHWA's transportation programs can help create safe, accessible, attractive, and environmentally sensitive communities where people want to live, work, and recreate. FHWA funds benefit recreation including hiking, bicycling, in-line skating, equestrian use, cross-country skiing, snowmobiling, off-road motorcycling, all-terrain vehicle riding, four-wheel driving, or using other off-road motorized vehicles. Join this session to learn about current FHWA tools and resources!

Partners in Trails: Grand Valley

Scott Winans - COPMOBA, President; John Howe - COPMOBA, Grand Junction Chapter Chair; Chris Pipkin - BLM, Grand Junction Field Office; Mike Bennett - City Manager, Fruita

The working relationships created within the Grand Valley power a singletrack trail movement that serves our local residents, cares for and utilizes our public lands resources, and provides a powerful and growing economic engine in our communities. Trails are the medium for this movement. Representatives from our trails non-profit COPMOBA, Bureau of Land Management, and the City of Fruita will share aspects of the growth, work, partnership, impacts, and results of these partnerships in a panel discussion format, with substantial time allocated for Q&A.

TUESDAY, MARCH 19

CONCURRENT SESSION C: 1:30 - 2:45 pm

Recreation Ecology: Investigating Trail Degradation on the Appalachian Trail

Fletcher Meadema, Graduate Student, Virginia Tech

This session presents findings from National Park Service funded research on the Appalachian Trail. We will explore the influence of trail layout on three forms of trail degradation: soil loss, widening, and muddiness. Our analysis confirms the benefits of core sustainable trail design principles, specifically low trail grades and rolling side-hill alignments, across a large and ecologically diverse data set.

Why Partner with Volunteer Stewardship Organizations and How to Do It

Anna Zawisza, Director of Community Relations & Strategic Partnerships;

Dan Williams, Associate Director of Statewide Stewardship, Volunteers for Outdoor Colorado (VOC)

Including volunteers as part of a well-planned and managed recreational trail project is increasingly viewed as providing numerous significant benefits. These include: insuring long-term maintenance needs are met, increasing stakeholder engagement and community buy-in, local economic development, high priority for public land managers, and greater interest from trail funders. Volunteers for Outdoor Colorado (VOC) will talk about the myriad reasons to undertaking construction, maintenance and other trail work with trained volunteers and volunteer organizations. VOC will also share resources and tools available through VOC and other organizations to build develop your volunteer stewardship capacity.

Creating Success for the 80%:

Techniques in trail design, construction, risk management and signage

Steven Ovitt, Wilderness Property Management Inc. / WPM Trails, PTBA Member

Techniques in trail design, construction, risk management and signage that create successful mtn. biking, hiking and backcountry & XC skiing experiences.

1. Understanding the recreational users who are the target for a specific trail.
2. Sustainable trail building techniques that create success, skill development and fun.
3. Utilizing a complexity analysis approach to risk management and recreational user success.
4. Signage that makes the 80% comfortable and successful.

Recreation Infrastructure for Climbing Areas

Julia Geisler & Lindsay Anderson, Salt Lake Climbers Alliance

The Salt Lake Climbers Alliance is the local rock climbing advocacy 501c3 non-profit that exists to be the voice for climbers in the Wasatch through stewardship, advocacy, community and education. We have led two successful climbing infrastructure projects and would like to share them as models for other areas. We will discuss two successful climbing infrastructure projects: 1) one the largest climbing access trail network on Forest Service property in the nation - in Little Cottonwood Canyon, Salt Lake City, Utah called the Alpenbock Loop Trail systems and 2) one at LDS Church owned property known as the Gate Buttress. This talk would be an in depth look at what climbing infrastructure means from transportation, toilets, climbing trail systems and specific rock masonry skills, as well as vertical route (trail) maintenance.

CONCURRENT SESSION E: 8:30 - 9:45 am

Art of Conscious Communications

Dr. Audrey Nelson, Nelson Communications

There is a direct correlation between how you communicate and your overall success both at work and home! You cannot not communicate; everything you say or do sends a message. Today's technology such as email, Twitter, and the Internet has made communication faster and more accessible. Telecommunication is a misnomer; we've lost the human moment. Additionally most of us operate on automatic in The first five seconds: There is no dress rehearsal for a first impression! Additionally, our everyday face-to-face communication. This highly interactive program brings communication into consciousness and supplies tools to help you send the message you want. Audrey Nelson, PhD., is an international trainer, key-note speaker; author and consultant who helps organizations increase their productivity and profitability through winning communication strategies. Bolster your communication skills – with clients, partners, volunteers – with this session!

Trails and the new CCC: Corps, Community, Collaboration

Cliff Kipp, Montana Conservation Corps, Northern Rockies; Jeff Roberts, Western Colorado Conservation Corps; Kevin Heiner, Southwest Conservation Corps

Conservation Corps are partnering with communities, land trusts, public agencies, nonprofits, and professional trail builders to create trails that connect communities, and connect youth to their communities. Come learn from three corps about innovative and cost-efficient partnerships that are pumping energy and funding into local trails projects - and in the process creating jobs and a next generation of trail stewards. Federal policies are incentivizing partnerships with conservation corps for trail development. Raise money, stretch it farther, and have more fun doing it with a new generation of trail builders.

Whitewater Creek

SEMINAR SESSION: 8:30 - 11:30 am

Field Contract Administration

Mike Shields, Michael D. Shields Consulting, PTBA Member

What causes contract performance to be a smooth versus nightmare experience for either the client, the contractor, or both. An overview with particular emphasis on contract lines of authority, Pre-Bid actions, the Inspection process and problems, and Contract Closure. Will include scenarios to spur the discussion, but bring your own successes and/or failures to share.

What mountain bikers want to ride: current social science research in mountain biker motivations, preferences, and identity.

Samuel Dobrozi, Master's Student, Clemson University

Mountain bikers want more trails to ride. What should be planned and built? Cross-country trails? Downhill runs? Dirt jumps? What's an "all-mountain trail" and how do I build it? What do those words mean, and how do mountain bikers actually experience them or decide where to ride? This ongoing research by Clemson master's student Samuel Dobrozi gains insight into these questions through an exploratory mixed methods study, using in-depth interviews and survey research with mountain bikers around the country.

Safe and Effective Use of Preserved Wood in Trail Building

Butch Bernhardt, Sr. Program Manager, Western Wood Preservers Institute

Preservative-treated wood can ensure the durability of outdoor structures, including decks, gazebos, trail railings, fences and wood pedestrian bridges. In this presentation, participants will learn about the manufacturing process for pressure-treated wood, the preservatives used today, the available products and their differences, and how preserved wood is used in trail and outdoor projects. Topics include an overview of preservative treatments, desired service life and exposure conditions, AWWPA Use Category standards, Best Management Practices for use in aquatic and sensitive areas and current issues concerning the safe use of preserved wood. Participants will also receive instructions for free downloading of the Treated Lumber Guide smartphone/tablet app.

Bridges 101

Charlie Dundas, Tri-State Company, PTBA Member

Introduction to the basic types of trail and pedestrian bridges by Tri-State Company, Inc. Includes discussion of the basic considerations of bridge design. Discussion of site selection, the "physics of bridge functioning", dead load, live load, and moment of load. The presentation includes photos, drawings, and animations.

Colorado Room

Clino Over Ego: Ten Observations On Creating Trails & Trail Destinations

Tony Boone, Tony Boone Trails, Inc., PTBA Member

60-75 minute session recently presented at T.H.E Trail Summit in Fruita, CO (Oct. 2018) on the hazards and pitfalls of creating trails with ego instead of sound, sustainable Best Management Principles. I will share some of the most important lessons/observations I've learned over the past three decades working with multi-national trail crews and unique trail destinations around the world.

Whitewater Room

Building Coalitions Through Consensus: Mediation and Interest-Based Negotiation Skills for Community Trail Planning

Evan Pilling, Sonoran Desert Mountain Bicyclists

Effective trail planning involves including community stakeholders in the entire planning process. Often stakeholder concerns are not sufficiently understood or addressed, and relatively minor issues snowball and become major problems down the road. Inclusion of all trail user groups, community members, environmental advocates, and government officials promotes long-term sustainability of trail projects and yields trails that benefit the entire community. Join this skills-based presentation that outlines the principles and practices of mediation and interest-based negotiation and how they can be applied to work with stakeholders, address concerns and disagreements, and develop long-term consensus. Evan Pilling is a trained mediator and holds a Master's Degree in Counseling Psychology.

Creek

THURSDAY, MARCH 21

SESSION I: 10:15 - 11:30 am

Bridges 103

Charlie Dundas, Tri-State Company, PTBA Member

Case studies of the construction of four differing trail bridge designs, detailing the the thought behind the selection of the type of bridge, the process, material, and critical path of construction. Also included are display of the elements of construction control used by Tri-State Company, Inc. [Nikon Total Station EDM, Trimble Recon Construction Computer, and Nikon Auto level as well as older style of transit levels and measuring tools]. This presentation will focus on the following types of bridges: Cable suspension, glu-lam beam, prefabricated steel, and curvilinear screw-lam bridges.

Colorado Room

High Community Impact Trail Systems: Successful And Innovative Approaches To Rapidly Creating A Trail-Rich Community

Scott Linnenburger, Kay-Linn Enterprises, PTBA Member

Most of our common examples for healthy, happy, trail-focused communities developed organically over fifteen to twenty years and depend on access to hundreds of thousands of acres of public land- conditions that simply aren't viable for many communities. Many communities across the country have made up for lost time or lack of abundant land in innovative ways- from creating unwitting or unusual community influencers, to tapping into alternative funding sources and even private investment. By not following the rules of the past, these communities are proving that "going big" by being strategic is their charted course for a successful trails future. Scott Linnenburger, Principal of Kay-Linn Enterprises (PTBA Member Company), has been involved with many of these projects over the last 15 years, learning to recognize and facilitate the key elements of successful, rapidly developed trails communities. He will present numerous examples and engage the group in an active discussion around these high-impact trail developments.

Whitewater Room

Tools for Trails

Jerome Pelland, Sentiers Boréals, PTBA Member

A review of various tools and products available to optimize trail planning, construction and maintenance. Pros and cons of various products will be presented by a leading contractor and invited professionals.
