SCIENCE

The Mind of the Universe is an international tv series and open source digital platform about the rapid evolution of our knowledge. It explores the human destiny and the world of tomorrow through the eyes of the greatest thinkers and scientists of our time. Great minds from all continents all over the globe.

The Mind of the Universe is a unique and unprecedented open source project in its scope and intention to provide all its programs, raw footage and research for free to everyone interested in learning and knowledge.

The series consists of ten episodes, presented by Robbert Dijkgraaf: director and Leon Levy Professor at the Institute for Advanced Study in Princeton. In each episode, a typical human quality takes central stage, in which the scientists and their research are embedded.
