AT LINCOLN CENTER**

MISSION

The Voice Health Institute (VHI) is an independent federally-approved (501-c-3) nonprofit public charity organization that was founded in 2003 by patients who suffered voice loss and struggled to find effective treatment. The VHI's mission is to raise charitable funds to support research, education and outreach programs that will improve the standard of care for voice and upper airway problems. It has been the most successful organization of its kind and more than 90% of the funds that VHI raises are used to support these programs.

OVERVIEW

Voice is the foundation of normal human communication. Unfortunately, many millions of people suffer from the devastating personal and social-economic consequences associated with voice loss caused by disease or trauma. This includes vocal cord cancer, precancerous dysplasia, paralysis, bleeding, polyps, nodules, infectious diseases such as HPV (Human Papilloma Virus), Recurrent Respiratory Papillomatosis (RRP) & airway obstruction.

The Raise Your Voice Gala kicks off the VHI 15th Anniversary Fund with the goal to raise 15 million dollars. It celebrates VHI's support of medical-surgical breakthroughs and educational programs that have preserved or restored thousands of voices, and will help ensure that research, education, and outreach continue to advance the standard of care - to restore speaking and singing capability to millions of individuals whose voices have been lost or damaged by disease or trauma. Currently scheduled to appear at the event: Julie Andrews (Honoree), Roger Daltrey, Sam Smith, and Keith Urban.

Much of VHI's funding goes to support the work of Dr. Steven Zeitels and Dr. Robert Hillman, and their interdisciplinary teams of researchers and clinicians. This has produced many new surgical techniques and instruments including new laser-based surgical approaches and targeted drug therapies for effectively treating vocal cord disease and trauma while preserving or restoring the voice. The VHI also funds Fellowships in Laryngeal Surgery with Dr. Zeitels so more surgeons can be trained in state-of-the-art methods for treating voice problems and provide the best care to more patients - to date more than 30 Fellows have completed post-residency training and are now caring for patients at leading national and international institutions. The VHI also promotes public awareness of new developments in treating voice problems so that patients can find the best care.

The Honorary Chair of the VHI is legendary star of stage and screen Julie Andrews. She is joined by an Advisory Board that includes Steven Tyler, Roger Daltrey, Joe Buck, Sam Smith, Keith Urban, Lionel Richie, Christina Perri, Tom Hamilton, Dick Vitale, and Donny Osmond - all prominent personalities whose voices have already been saved by the VHI-funded medical-surgical innovations of Dr. Steven Zeitels and his research team.
