

Versa**TILES** are a huge 24" x 24" puzzle lock floor tile made from rugged and resilient PVC. Perfect over many surfaces...including damaged ones.

**Description:**

Our larger design tile provides a flooring system with fewer seams. Less seams means quicker, better looking installations. Versa**TILES** softer material make up allows it to conform to sub floor irregularities more easily than the smaller, stiffer tiles on the market. This material actually makes our tiles quieter to walk on than most polypropylene tiles. No adhesive is needed and moisture will not hurt our tile. Versa**TILES** come in a coin top and smooth top design making them ideal in most commercial, industrial and residential applications.

**Applications:**

- Trade shows
- Retail display platforms
- Garages & basements
- Storage units
- Assembly lines
- fitness areas
- Elevators/stairwells
- Mobile offices
- Temporary floors
- Sports surfacing
