DREAM WEAVERS

While 2016 has marked the great rattan revival (see Habitat's superlative spring/summer offering), a growing number of brands are embracing the weaving trend more broadly. Take Instagrammer Danielle Clough (@fiance_knowled), who has amassed more than 50,000 followers thanks to her vintage woven tennis rackets that double as offbeat wallhangings. For a more modern take visit The Conran Shop, where designers such as David Lopez Quincoces demonstrate how tightly woven wicker can look sharp and sophisticated. Lighting gets a look-in, too — opt for a knotted chandelier, which will cast a softer and more flattering light than the denuded filament bulbs of yesteryear.
