RepairWare makes old, obsolete PC's run like new and literally never need to be replaced again.

RepairWare is:

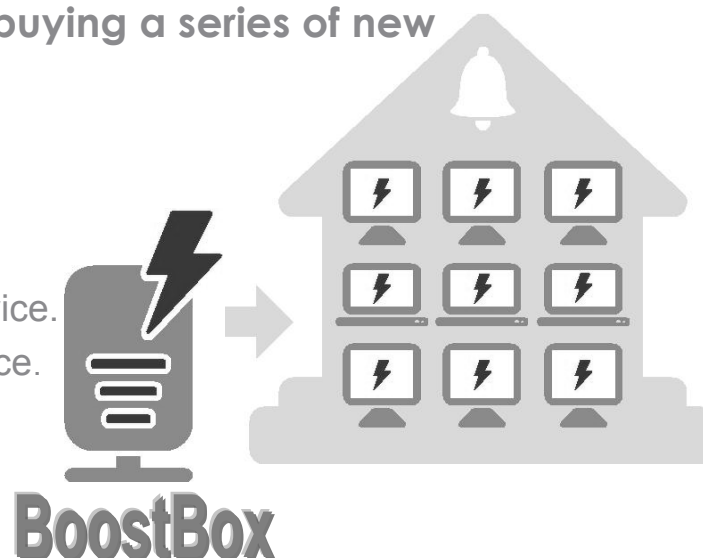

- A turnkey, cost-effective solution, which means that you never have to replace your PC's again.
- Dedicated to only serving education.
- Gives your school instant access to a dedicated on-call support team.
- Secure, reliable, and fast.
- A simple and revolutionary solution for schools lacking personnel and budget resources.
- Environmentally friendly, and recognized as an innovator.
- Ideal solution to help budget constrained schools prepare for modern day computer based education.

Schools need computers.

Classrooms need reliable and powerful technology, however most schools are stuck in a cycle of replacing expensive computers every few years. RepairWare uses the old computers schools already have, by adding a BoostBox, which makes them run like new at a fraction of the cost of buying a series of new PC's.

RepairWare is:

- Uniquely tailored to the school environment.
- An environmentally friendly, sustainable service.
- A recognized innovator in the technology space.

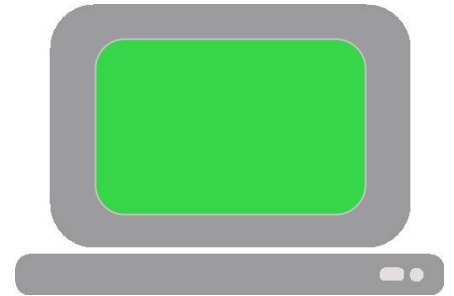

Computers need to be reliable.

IT Integration Specialists supports thousands of computers across the spectrum and understands the unique environments of a school system. Both the education and technology worlds have noticed, and continue to acknowledge, the value of our innovative service.

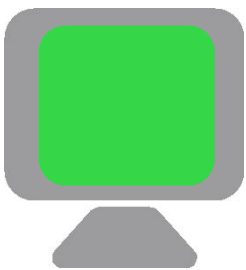

RepairWare allows schools to:

- Give students the advantage of using the latest technologies, preparing them for the future
- Run all typical applications and software
- Save valuable teacher/administrator time by providing a turnkey solution and dedicated and friendly support
- All PC's run at the same lightning fast speed

Performance matters.

Typical school PC's slow down as they get older and ultimately need to be replaced. Tablets are expensive and lack the features that many teachers and students rely upon. Busy teachers or administrators are required to closely manage technological resources.

With the RepairWare service:

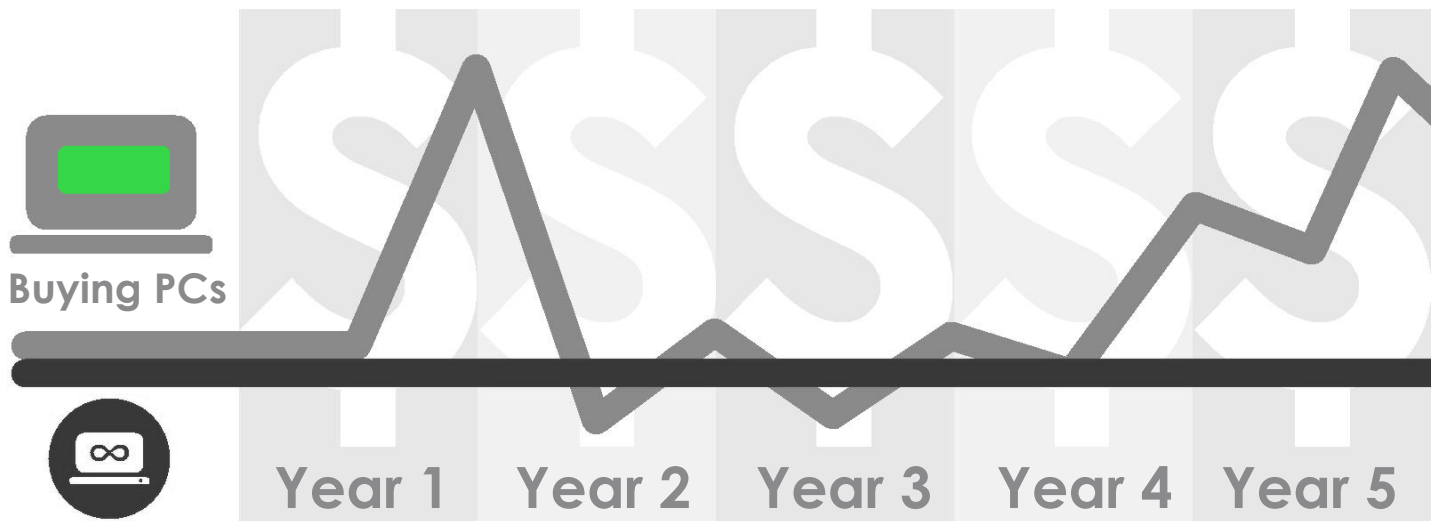

- You only need to configure the BoostBox and all connected computers will be configured instantly
- Nothing changes to the current IT or network setup
- Machines are reset after each log-out, ensuring students have all the benefits of using a brand-new machine, every time

Cost matters.

RepairWare beats traditional hardware and tablets in sustainability, performance, cost, and functionality. When we say you will never have to buy new computers for your school again, we mean it.

With RepairWare:

- Schools can save up to 70% of their technology budget across a five year period.
- There are no hidden costs or fees. Ever.
- Installation, training, system maintenance, and full access to friendly and professional on-call support teams are included.

RepairWare, the game-changer.

Contact us now to make your old PCs run like new.
