

DHS HEDIS® Reporting

The Foundation of DHS

DHS Group has been engaged in Health Plan Audits and Performance Measurement Consulting for nearly 20 years. When it comes to HEDIS auditing, the DHS team has experience from the client, vendor and auditor side of the business, helping us see the process from all angles. This depth of expertise delivers results that are cost effective, save time, and produce higher HEDIS scores as well as better compliance for clients.

HEDIS REGULATORY REPORTING SERVICES

DHS Group has been engaged in Health Plan Audits and Performance Measurement Consulting for nearly 20 years. When it comes to HEDIS auditing, the DHS team has experience from the client, vendor and auditor side of the business, helping us see the process from all angles. This depth of expertise delivers results that are cost effective, save time, and produce higher HEDIS scores as well as better compliance for clients.

HEDIS PROACTIVE REPORTING

DHS HEDIS solutions are customized to suit the specific needs of each client. Typically, DHS HEDIS solution packages include one or more of the following reporting services, and assist clients in achieving ongoing HEDIS compliance:

- Performance metrics production from basic run to full outsource solutions
- Full outsource IT solutions including raw data transfer, data mapping, data loading, and data optimization
- Custom business intelligence solutions and dashboard design
- Medical record review and tools, plus much more.

JOIN THE MOVEMENT

Over the past few years, with the introduction of the federal Pay-for-Quality initiatives to stem the rising cost of health care while improving its quality, DHS started offering HEDIS Proactive Reporting. This service provides health plans with the strategies and tools to intervene early and often to ensure members are getting the care they need by the appropriate provider in a timely manner. With it, health plans will be able to:

- Identify GAP in care and non-compliant members or providers with low compliance.
- Elect to utilize CHART Pack as Quality Improvement and Intervention Tools that span from Member Outreach to Provider Outreach.
- Pinpoint which provider needs to prop up their HEDIS rates and what members are not getting the care they need according to the HEDIS specifications.
- Incentivize high performing providers and penalize low performing ones.

HEDIS is a registered trademark of The National Committee for Quality Assurance.
