

Facilitating Desirable Business Change

TOGAF 9 Courses

Why Inspired?

Unique organisational expertise and instructors

We have delivered Enterprise Architecture work as consultants and practitioners since 1989. Frameworks used include Zachman, IAF, TOGAF, FEAF, Gartner, Meta, Inspired, PEA and others. We have unique EA capabilities, techniques and expertise. We have integrated TOGAF with other methods, including Archimate, and produced integrated meta models to provide TOGAF and Archimate capabilities within EA toolsets.

We understand EA in depth, having been involved in scores of projects internationally across a wide range of industries including finance, assurance, retail, telecommunications, services, healthcare, government, education, manufacturing, software, energy and media. We develop TOGAF certified training, are registered as a TOGAF services provider and have created certified support in EA tools. Typical instructor will have over twelve years EA experience.

Practical TOGAF 9

Duration

5 days

Brief Description

A practice-oriented, comprehensive course leading to TOGAF 9 Level 2 certification. Extensive coverage of Enterprise Architecture using the TOGAF framework and Architecture Development Method. Updated to include coverage of TOGAF 9.1 release.

What Differentiates this Course?

Case Study

The comprehensive case study is based on three real world EA projects and provides delegates with a much richer appreciation for the scope and subtlety of issues in real EA projects than typical class exercises

Hands On

Delegates will do individual and team assignments to apply knowledge and experience techniques first hand. This enhances learning and provides delegates with more confidence and a faster start when returning to their organisations

Longer Course

Some courses are offered over four or even three days. We do not believe that these provide sufficient time for proper coverage of all the topics required to understand TOGAF fully or to prepare for certification properly

Additional Coverage

TOGAF is valuable and extensive, but not perfect! Our extensive expertise allows us to supplement TOGAF in key areas to make it even more effective and valuable

High Quality Delegate Materials

Including electronic reference, pocket guide, self study guides for levels 1 & 2, sample exams, slides and additional references

Intended Audience

This course is intended for those working as enterprise architects (business architects, process architects, application architects, information architects, technology architects, solution architects) or who intend to take up such roles. It would also benefit CIOs, application portfolio managers, I.T. strategists, senior business analysts, programme managers and those responsible for change programmes.

Course Overview

This course covers the body of knowledge required for TOGAF 9 certification at Levels 1 and 2. The course is accredited by The Open Group.

Successful delegates, after sitting the independent examination, will be registered with the Open Group as certified TOGAF 9 Architects, becoming part of a select international community. The course is about more than just certification, however, as the training goes far beyond simply covering the body of knowledge from the TOGAF manual.

Additional material over and above TOGAF is provided in order to put EA and modern architectures such as Service-Oriented Architecture (SOA) into perspective. An in-depth case study based on real world projects shows application of techniques through a typical architecture implementation lifecycle.

The 15+ practical assignments completed during the five days of training, learning from other delegates and the experience and expertise of the lecturer(s) combine to create a sound, practical, effective and compelling learning experience.

Typical Coverage

The course coverage is aligned with the requirements for course accreditation and delegate certification laid down by the Open Group. It includes:

- Concepts of and need for Enterprise Architectures
- Principles of EA and available frameworks
- Architecture vision, principles and goals
- Architecture Components and Framework coverage
- Architectures in the organisation, including Architecture Governance
- Business Architecture and Requirements
- TOGAF™ Architecture Development Method
- Architecture Phases (All covered by the ADM 'crop circle')
 - Architecture Activities
 - Architecture Deliverables and Viewpoints
- Examples of Business Process, Information, Applications and Technology Architectures
- Architecture Building Blocks
- The Enterprise Continuum and the role of a repository
- TOGAF Reference Models including:

- The Integrated Information Infrastructure Reference Model (IIIRM)
- The Technical Reference Model (TRM)
- TOGAF Architecture Content Framework
- Architecture Skill Requirements
- Architecture Compliance and Maturity
- Meta Models and Tooling to practically achieve architecture benefits

Certification

Delegates completing the course are eligible to take the open group online examination to either certify at Level 1 (Foundation) or Level 2 (Certified). In the case of the latter, there is a combined Part 1 and 2 option where both levels are written at consecutive sittings on the same day.

These exams are available in all major centres at Prometric examination facilities. Bookings can be made online. Students will be provided with examination vouchers.

Provided Materials

Delegates receive high quality printed notes, including presentation slides, case study materials and assignments. Selected sample solutions are also provided. A reference CD is provided with electronic copies of TOGAF

Reference material and self study guides for both certification level examinations. These guides are approved by the Open Group.

A further CD is provided with links, references and further reading material as well as an evaluation copy of our comprehensive TOGAF certified EA Modeling toolset, EVA Netmodeler. Delegates receive vouchers valid for one sitting of the relevant examination.

NOTE: These materials may be provided online.

Comments from Past Delegates

This is an excellent course to attend in order to understand the fundamentals of EA - TW

Good practical course in getting to grips with TOGAF - Anonymous

Extensive coverage of TOGAF 9 - MG

Informative, relevant, well-structured - AM

Intensive, yet concise and very essential - TG

Intensive, rewarding and inspiring - NG

It made the airy-fairy concepts of EA into practical steps with adequate supporting examples & work to utilise it - MM

Very good and highly recommended - MJ

Good insight into the concerns of the business from an architectural view - MB

Comprehensive - AP

Amazing and Intense - GC

A lot of powerful tools were presented - RC

Content is very good, especially the real life examples - TL

I now have a good feel for TOGAF and I understand what the certification is about. - HS

Awesome - LM

Thanks! I passed level 1 & 2 with 82% and 80% respectively. - FM

Location, Costs and Dates

Courses are offered in Europe (Germany, Switzerland, Spain, Netherlands, United Kingdom), South Africa (Cape Town, Johannesburg, Durban), and Malaysia. They can be conducted onsite in other locations on request.

Practical TOGAF Foundation

Duration

2.5 days

Brief Description

A practice-oriented, comprehensive course leading to TOGAF 9 Level 1 (Foundation) certification. Coverage of Enterprise Architecture using the TOGAF framework and Architecture Development Method. Updated to include coverage of TOGAF 9.1 release.

What Differentiates this Course?

Case Study

The comprehensive case study is based on real world EA experience and projects and provides delegates with a much richer appreciation for the scope and subtlety of issues in real EA projects than typical class exercises

with more confidence and a faster start when returning to their organisations

Additional Coverage

TOGAF is valuable and extensive, but not perfect! Our extensive expertise allows us to supplement TOGAF in key areas to make it even more effective and valuable

High Quality Delegate Materials

including electronic reference, pocket guide, self study guides for level 1, sample exam, slides and additional references

Intended Audience

This course is intended for those who need an appreciation of Enterprise Architecture and an overview of TOGAF, but who do not require full certification at level 2, which is intended for working/professional architects. It can be used to begin the journey to taking up an architect role. It would also benefit CIOs, application portfolio managers, I.T. strategists, senior business analysts, programme managers, project managers, senior developers and those responsible for change programmes.

Course Overview

This course covers the body of knowledge required for TOGAF 9 certification at Level 1

(Foundation). The course is accredited by [The Open Group](#).

Successful delegates, who complete the independent examination, will be registered with the Open Group as TOGAF Foundation qualified.

Additional material over and above TOGAF is provided in order to put EA and modern architectures such as Service-Oriented Architecture (SOA) into perspective.

An in-depth case study based on real world situations shows application of techniques through a typical architecture implementation lifecycle. The 6+ practical assignments completed during the two days of training, learning from other delegates and the experience and expertise of the lecturer(s) combine to create a sound, practical, effective and compelling learning experience.

receive vouchers valid for one sitting of the relevant examination.

Typical Coverage

The course coverage is aligned with the requirements for course accreditation and delegate certification laid down by the Open Group. It includes:

- Concepts of and need for Enterprise Architectures

TOGAF Overview

Duration

1 Day

Description

An intensive one day overview of TOGAF for Executives, Managers and Senior Technical staff who need to understand the relevance, coverage and components of TOGAF, but who will not themselves require detailed method, guidelines or techniques, such as provided in certification oriented training.

Coverage

Course coverage includes:

- Overview of Enterprise Architecture
- Business Value of EA
- Open Group and TOGAF
- Goals and Principles of TOGAF
- TOGAF Content and Coverage
- Introduction to the Architecture Development Method
- Phases, Goals and Outputs
- TOGAF Guidelines and Techniques
- Architecture Content Framework

+27 21 531 5404

- TOGAF Reference Models
- Architecture Maturity and Capability Framework
- TOGAF and Service Oriented Architecture
- How TOGAF Relates to other Frameworks (incl: MITP, PMS, COBIT, ITIL) & Responsibility areas (Programme Mgmt, Portfolio Mgmt, Development, IT Management, Operations)
- TOGAF and Archimate notation
- TOGAF and Security
- TOGAF interface to Development
- TOGAF and Solution Architecture
- TOGAF strengths and weaknesses
- TOGAF Certification requirements (optional)

Provided Materials

Delegates receive high quality printed notes, including presentation slides, online reference links and selected white papers.

Comments From Delegates

“Excellent overview. Puts it all in perspective. Thanks!”

“Wish the TOGAF materials themselves were as clearly explained”
