Enterprise Architecture with TOGAF® Standard

Duration
2.5 days

Brief Description
A practice-oriented, comprehensive course covering the syllabus for TOGAF 9 Level 1 (Foundation) certification. The course is not accredited by The Open Group but is derived from our accredited full certification course. Delegates may independently elect to take the TOGAF Part 1 Examination to become Foundation Certified. Coverage of Enterprise Architecture using the TOGAF standard and Architecture Development Method.

What Differentiates this Course?

Case Study
The comprehensive case study is based on real world EA experience and projects and provides delegates with a much richer appreciation for the scope and subtlety of issues in real EA projects than typical class exercises.

Hands On
Delegates will do individual and team assignments to apply knowledge and experience techniques first hand. This enhances learning and provides delegates with more confidence and a faster start when returning to their organisations.

Additional Coverage
The TOGAF standard is valuable and extensive, but not perfect! Our extensive expertise allows us to supplement the TOGAF approach in key areas to make it even more effective and valuable.

High Quality Delegate Materials
Including printed colour manual, electronic reference, pocket guide, self study guides for level 1, sample exam, slides and additional references.

Intended Audience
This course is intended for those who need an appreciation of Enterprise Architecture and an overview of the TOGAF standard, but who do not require full certification at level 2, which is intended for working/professional architects. It can be used to begin the journey to taking up an architect role. It would also benefit CIOs, application portfolio managers, I.T. strategists, senior business analysts, programme managers, project managers, senior developers and those responsible for change programmes.

Course Overview
This course covers the body of knowledge required for TOGAF 9 certification at Level 1 (Foundation).

Successful delegates, who complete the independent examination, will be registered with The Open Group as TOGAF Foundation qualified.

Additional material over and above TOGAF documentation is provided in order to put EA and modern architectures such as Service-Oriented Architecture (SOA) into perspective.

An in-depth case study based on real world situations shows application of techniques through a typical architecture implementation lifecycle. The 6+ practical assignments completed during the two days of training, learning from other delegates and the experience and expertise of the lecturer(s) combine to create a sound, practical, effective and compelling learning experience.

Compliant with TOGAF® standard

**Typical Coverage**

The course coverage is aligned with the requirements for course accreditation and delegate certification laid down by The Open Group. It includes:

- Concepts of and need for Enterprise Architectures
- Principles of EA and available frameworks
- Architecture vision, principles and goals
- Architecture Components and Framework coverage
- Architectures in the organisation, including Architecture Governance
- Business Architecture and Requirements
- TOGAF® Architecture Development Method
- Architecture Phases (All covered by the ADM ‘crop circle’)
  - Architecture Activities
  - Architecture Deliverables and Viewpoints
- Examples of Business Process, Information, Applications and Technology Architectures
- Architecture Building Blocks
- The Enterprise Continuum and the role of a repository
- TOGAF Reference Models including:
  - The Integrated Information Infrastructure Reference Model (IIIRM)
  - The Technical Reference Model (TRM)
  - TOGAF Architecture Content Framework
  - Architecture Skill Requirements
  - TOGAF® coverage of Risk and Security
  - Architecture Compliance and Maturity

**Certification**

Delegates completing the course may elect to take The Open Group online examination to certify at Level 1 (Foundation). These exams are available in all major centres at Pearson VUE examination facilities. Bookings can be made online.

**Provided Materials**

Delegates receive high quality printed notes, including presentation slides, case study materials and assignments. Selected sample solutions are also provided. A reference site is provided with electronic copies of TOGAF Reference material and self study guide for level 1 certification examination. The guide is approved by The Open Group.

A web resource is provided with links, references and reading material.

**Comments From Delegates**

“Really helped me to understand EA and TOGAF and how it fits in the bigger picture”

“I now feel confident to manage Architecture professionals using the standard”

“Ideal for those who engage with Architects (like me in Programme Management) to understand their language”

**Location, Costs and Dates**

Courses are offered in Europe (Germany, Switzerland, Spain, Netherlands, United Kingdom), South Africa (Cape Town, Johannesburg, Durban), and Malaysia. They can be conducted onsite in other locations on request.

**Bookings and Further Information**
