

Museum Model Assembly Guide

- 1.** Wait for crate to acclimate to indoor temperature to avoid condensation on electronics.
- 2.** Use bit (found taped to underside of crate) to remove top of crate and 2x4 braces.
- 3.** Unpack crate and check for damages.
- 4.** Assemble legs. Use included screws to attach cross members according to their corresponding letters/numbers.
- 5.** Set sandbox on top of leg assembly.
- 6.** With two people, set mast in slots on back of sandbox. Ensure mast is seated so cross member is in contact with sandbox.
- 7.** Plug 3 power cords hanging from mast into provided extension cord and then plug extension cord into power outlet
- 8.** Fill sandbox with your preferred substrate.
- 9.** Push the green button on the back of the mast.
- 10.** Power up projector using included remote control.
- 11.** Enjoy!
