FIBERTEX CAPILLARY MATTING is top of the range 250 Heavyweight Capillary Matting provides optimum water movement combined with a water holding capacity, which has been proved over many years to be ideal for wide range of indoor and outdoor plants. The use of virgin fibres ensures non phyto-toxicity. Rapid water absorption and retention are special features of this matting, it will give long efficient use, and it's easily cleaned and reversible.

Please contact us for sizes & options.

We have a number of JFM Shade & Windbreaking Netting options available. Please contact us for more information.
