

K-GLOSS™

FAQs

What is Keratin?

Keratin is a protein found naturally in our hair, skin, and nails.

Why is Keratin important for my hair?

When we put our hair through stress with coloring, heat styling, and other chemical services, we open the cuticle and compromise the our healthy keratin structure. It is important to revitalize and replenish the keratin, ensuring that we give it a healthy shine and lustrous manageability. K-Gloss smoothing treatments helps with restoring our hair back to its keratin enriched form.

What is K-Gloss?

K-GLOSS is the #1 Keratin Bond Transformation System for your hair. Our breakthrough formula delivers the building blocks of beautiful. After just one simple application, K-GLOSS injects keratin and collagen to boost shine, gloss, and moisture. K-GLOSS protects the hair from heat and environmental stress, giving longevity to color treated hair, and revitalizing dull and damaged tresses. K-GLOSS is more than a smoothing treatment, it's the only way to make your hair happy.

K-GLOSS™

FAQs

What makes K-Gloss smoothing treatment different from all the other brands on the market?

- The K-Gloss smoothing treatment formula is water based, unlike other treatments that contain silicon based moisturizers. This means the process is faster and cuts the salon time in half, while maintaining the best results.
- K-Gloss is safe to use on all color treated, chemically treated hair, and virgin hair. Unlike other Keratin brands where hair quality can become compromised.
- K-Gloss is safe for children 13 years and older.

What are the main benefits of getting the K-Gloss treatment?

- Blow dry time will be reduced by 40-60%.
- Frizz is eliminated by 90%.
- Hair will maintain natural body, while becoming softer, shinier, and more manageable.
- K-Gloss is safe to use on color treated and chemically treated hair.
- K-Gloss can be used on all hair types, from curly to straight. K-Gloss smoothing treatment, does not damage the structure of the hair and maintains the natural integrity.
- Lasts up to 4 months.

What if I get my hair wet before 24 hours?

Immediately blow dry and flat-iron on low heat.
