FREE Classroom Programs and Field Trips for Bellevue Schools sponsored by Bellevue Stream Team and City of Bellevue Utilities

BLUE TEAMS (Grades K-5):
You have the opportunity to create a youth-powered Blue Team to help care for one of our most precious natural resources – WATER! Blue Teams carry out a water quality action project that promotes watershed sustainability and stewardship in their community. Each team receives expert help from a Naturalist to help plan, prepare and execute their project.

WETLAND FIELD EXPERIENCE (Grades 3-5):
Meet a naturalist at a local stream, river, lake or wetland of your choice (near your school or we can help choose a site) and perform scientific investigative experiments at the water’s edge. Determine the health of the water body by identifying the macro-invertebrates living there, testing the pH, dissolved oxygen and looking at other components of the ecosystem, such as plants.

SALMON CYCLES (Grades 3-5):
Students will understand the life cycle of our Pacific Northwest Salmon, a Keystone Species, and learn why they are so important to the health of our streams and watershed ecosystems.

REGISTRATION INFORMATION: Programs are led by Nature Vision, a local non-profit organization of experienced environmental educators. To register for programs and field trips, visit http://www.naturevision.org/program-registration/. Register online or print out the registration form and fax it in per the instructions. Please contact Nature Vision at 425-836-2697 with any questions.

TO REGISTER FOR A BLUE TEAM: Visit https://naturevision.org/blue-teams, fill out the registration form and send in via fax or scan and email.
