Ordering information is given at the end of this document including patina color codes and the finishes of strike and face plates. When ordering please specify backset, thickness of door and whether door is left or right handed.
FINISHERS

Some of our pieces are available in two categories of finish, corresponding to two different pricing bands. Our Morphic and Ergo pieces, as well as some sconces, are also available in stainless steel. Examples of each finish are shown here as accurately as the printing process will allow.

The color and metal of the strike and face plates is determined by the lock and latch manufacturer. We have selected the most appropriate strike plate finish to complement our own finishes and this is shown alongside.

Hot Patina Bronze *(Price category R)*

These finishes are hot patinas that react uniquely with each bronze piece so that no two items will be the same. The colors will change over time in a manner determined by the local environmental conditions. To help prolong the life of the patina the pieces are finished with a clear lacquer which may slow the color change but not stop it.
FINISHES

Oil Rubbed Bronze *(Price category B)*
This is a hand rubbed oil finish which will change over time allowing each piece to develop its own unique patina.

- Polished Bronze
  Order code PB
  Strike plate

- Dark Antique
  Order code DA
  Strike plate

- Light Antique
  Order code LA
  Strike plate

Stainless Steel - Morphic and Ergo only *(Price category S)*
We offer 2 finishes polished-beaded and brushed. Through out the Ergo section of the catalogue you will see the polished-beaded finish. These pieces have both shiny and frosted or beaded areas, we typically frost the scoops and channels of an Ergo piece and leave the raised areas shiny and we make this artistic call. We also have a new brushed steel finish which you will see on all of our Morphic pieces.

- Polished-beaded
  Order code SS
  Strike plate

- Brushed
  Order code BS
  Strike plate
HOW TO ORDER

With the many options offered by our range and the variety of possible door configurations it is important to identify precisely the pieces you wish to order. Please read the following notes in conjunction with the example order form on page 174.

Product Code
Three codes are shown against each item in the price list, ending in a letter denoting category of finish. Select the code which covers the category of finish you require as shown on the previous two pages.

e.g. PLS369B for a Willow passage way set finished in oil rubbed bronze

Finish Code
Chose a specific finish from within the category indicated by the product code. Again these are shown on the previous two pages. Note that we cannot process the order if the product and finish codes do not match.

e.g. LA for a light antique finish

Door Thickness
It is important that we know the thickness of the door as this determines the length of the spindle and screws supplied with your order. We cater for industry standards of 1⅜", 1¾" and 2". If your door is not one of these standards then you will need to obtain a custom quote from our representative in your area.

Door Backset
The backset is the distance between the edge of the door and the center of the lever, Knob or lock as described opposite. This dimension is critical in determining the lock or latch we include with your order.

The standard backsets offered by the lock manufacturers we include with our trim are typically 2⅜", 2¾" and 3". However it is possible to order locks with greater backsets of upto 5" and even 6" but in this event you will need to contact our representative in your area for a custom quote.

Door Handing and Swing
Any door can be described quite correctly as either right handed or left handed depending on which side of it one is facing. It will also swing inwards or outwards. Many of our pieces come in right and left hand versions, use interior and exterior elements and take locks with latches for either inward or outward swings. Not surprisingly, therefore, opportunities for ordering errors abound so please use the guidelines below!

Take your viewpoint from the outside of the door. Eg. outside the bathroom door or outside the entry way door.

A right hand door has the hinges on the right, a left hand door has the hinges on the left. A door that swings away from you is considered normal, one that swings towards you is called a Reverse Bevel.

If you are ordering a number of identical pieces use multiple order lines if they have different handing and/or swing descriptions.

Even if you are ordering for a door that has no lock or latch i.e. a dummy trim, we still need to know the handing of the door to determine whether we send you a right lever and back plate or left lever and back plate.

The diagram opposite illustrates the handing and swing terminology.

Pricing
Our prices do not include freight charges, handling charges or the cost of insuring the product during transportation to you. We reserve the right to change our prices.

Where to Order
Please call us for a supplier in your area.
LOCK OPTIONS AND AVAILABLE BACKSETS

Tubular Latch
- Available backsets: 2 ⅜", 3", 4" or 5 ¼"

Tubular Deadbolt
- Available backsets: 2 ⅜", 3", 4" or 5 ¼"

Privacy Mortise Lock and Latch
- Available backsets: 2 ½" or 2 ¾"

Entry Way Mortise Lock
- Cylinder Port
- Turn Piece Hub
- Lever or Knob Hub
- Thumb Latch Hub
- Available backsets: 2 ½", 2 ¾", 3 ¼", 5" or 6"

When ordering you will also need to specify thickness of door and handing.

DOOR HANDING AND SWING

OUTSIDE

VIEW FROM THIS SIDE
When ordering sconces or illuminated handles please specify your choice of white, red, blue or green LED light.

All prices are EX-WORKS Martin Pierce Hardware’s location in Los Angeles and do not include California sales tax or any local state taxes that may apply.
PRODUCT CARE

Warranty for Door Hardware

Martin Pierce Hardware stands behind all of its bronze and stainless steel products with a lifetime guarantee on materials and workmanship. Internal mechanisms including locks, latches, fasteners supplied by Martin Pierce Hardware but manufactured by others are guaranteed for one year from the date of purchase. Finishes are not covered by this warranty, please refer to care instructions below for useful notes on cleaning bronze and steel.

Martin Pierce Hardware will not assume liability for any labor charges regarding the removal or reinstallation of its products; nor will we cover any freight, postage, or handling expense related to the product. Damages caused by accident, misuse, abuse, or improper installation are not covered by this warranty.

Care and Cleaning

Bronze and steel are both naturally weather resistant requiring little maintenance and are simple to care for. Our castings are made with 85% recycled metal and are made in the USA right here in Los Angeles. Our stainless steel products are available in 304 stainless steel which has excellent corrosion resistance and upon request, in 316 stainless steel which is ideal for coastal areas as it is more resistant to corrosion from salt.

Bronze is an alloy made from copper, manganese and silicon and it will oxidize over time as it ages. Each piece will oxidize in its own way thereby creating a unique piece. The sun, wind, air, sea air and even the oils in your hand will all play their part in the way our hardware changes over time. These effects are naturally occurring and add character and maturity to each piece. Cleaning all surfaces with a mild soap, water, and a non-abrasive cloth will help the hardware age gracefully. We recommend against the use of any cleaning agents that contain abrasives or chemicals as these may discolor or corrode the piece.

Our brushed stainless steel castings can be cleaned with a lint free or microfiber cloth and a stainless steel cleaner that should be applied in the same direction as the grain of the brushed surface. For polished surfaces the cleaner should be applied in a circular non directional pattern.

Individuality - Truly Hand-Crafted

Our hardware is made to order and each piece is "chased" or "cleaned" by hand, as a result no two pieces are identical. This individuality makes each piece a truly unique work of art. Please read our chapter “The Process” to learn more about how we make our hardware by hand.

Finishes, hot and cold patinas

Our hardware is available in a limited number of finishes which include some cold and hot patinas. All of these finishes will change over time giving each piece its own unique patina. There is no lacquer, cleaner or wax that can stop this natural process.
