APPENDIX 1: Glossary

Call for Community Partners Guide: That's this document, telling you all about this new program!

Project Area: The street, network, or geographic area about which the applicant proposes to conduct engagement with local stakeholders.

Pop-Up Project: Temporary projects that last for a day, a weekend, or other short period of time. These projects test out new ideas for streets to educate stakeholders and gain feedback.

Build Project: Projects developed in partnership between the Community Partner and City. These projects will undergo community outreach, concept development, design, and construction within a roughly 18-month timeline.

Community Partners: The individual organization(s) selected by the City to help identify needs, lead community outreach, and assist in developing concepts.

Technical Consultant: A consultant team hired by the City to support Community Partners with technical tasks for the Pop-Up Projects and Build Projects, such as conducting analysis, making recommendations, developing designs, and assisting with event production.

City Partners: The staff of the City of Los Angeles who oversee the entire Great Streets Challenge Program, coordinate resources and assist in designing, planning, and constructing projects.

Call for Community Partners: The application process through which Community Partners apply to work with the city on Pop-Up Projects or Build Projects.
